

Industrial and Commercial Bank of China

This consultative document provides a comprehensive and practical guidance on real-life scenarios. There is one suggestion about tool 13 “Security Operation Center”. As we all know, precaution, monitoring and proactive response are the most efficient ways to deal with cyber incidents. We recommend that the description of SOC could be expanded on cyber security threat perception, internal and external cyber threats prediction, centralize security policy control and to effectively detect, identify, prevent, investigate and respond to cyber incidents.
