- VIII. Strengthening deposit insurance
- IX. Safeguarding the integrity and efficiency of financial markets
- X. Enhancing financial consumer protection

List of abbreviations used

Sources of recommendations

List of contact persons from the FSB and standard-setting bodies

National authorities from FSB member jurisdictions should complete the survey and submit it to the FSB Secretariat (imn@fsb.org) by **Friday, 12 July** (*representing the most recent status at that time*). The Secretariat is available to answer any questions or clarifications that may be needed on the survey. Please also provide your contact details for the person(s) completing the survey and an index of abbreviations used in the response.

National authorities are expected to submit the information to the FSB Secretariat using the Adobe Acrobat version of the survey. The Microsoft Word version of the survey is also being circulated to facilitate the preparation/collection of survey responses by relevant authorities within each jurisdiction.

Jurisdictions that previously reported implementation as completed in a particular recommendation are not required to include information about progress to date, main developments since last year's survey or future plans. Revisions to previously included text or descriptions of relevant developments and new reforms to enhance the existing framework in that area can be made as needed, but this is optional and should not lead to a downgrade from implementation completed to ongoing, unless these reverse previously implemented reforms. Jurisdictions that do not report implementation as completed are required to include full information both in the "Progress to date" and "Update and next steps" tables.

As with previous IMN surveys, the contents of this survey for each national jurisdiction will be published on the [FSB's website](#). Such publication is planned at around the time of the October 2019 G20 Finance Ministers and Central Bank Governors meeting. The FSB Secretariat will contact member jurisdictions in advance to check for any updates or amendments to submitted responses before they are published.

I. Hedge funds

II	III	IV	V	VI	VII	VIII	IX	X
----	-----	----	---	----	-----	------	----	---

1. Registration, appropriate disclosures and oversight of hedge funds

G20/FSB Recommendations

We also firmly recommitted to work in an internationally consistent and non-discriminatory manner to strengthen regulation and supervision on hedge funds.
(Seoul)

Hedge funds or their managers will be registered and will be required to disclose appropriate information on an ongoing basis to supervisors or regulators, including on their leverage, necessary for assessment of the systemic risks they pose individually or collectively. Where appropriate registration should be subject to a minimum size. They will be subject to oversight to ensure that they have adequate risk management.
(London)

Implementation of this recommendation was reported to be completed by all FSB jurisdictions in the 2016 IMN survey. Given this, the reporting of progress with respect to this recommendation will not be collected in the 2019 survey.

I. Hedge funds

II	III	IV	V	VI	VII	VIII	IX	X
----	-----	----	---	----	-----	------	----	---

2. Establishment of international information sharing framework

G20/FSB Recommendations

We ask the FSB to develop mechanisms for cooperation and information sharing between relevant authorities in order to ensure effective oversight is maintained when a fund is located in a different jurisdiction from the manager. We will, cooperating through the FSB, develop measures that implement these principles by the end of 2009. (London)

Remarks

Jurisdictions should indicate the progress made in implementing recommendation 6 in IOSCO's [Report on Hedge Fund Oversight \(Jun 2009\)](#) on sharing information to facilitate the oversight of globally active fund managers.

In addition, jurisdictions should state whether they are:

- Signatory to the IOSCO MMoU in relation to cooperation in enforcement
- Signatory to bilateral agreements for supervisory cooperation that cover hedge funds and are aligned to the 2010 IOSCO [Principles Regarding Cross-border Supervisory Cooperation](#).

Jurisdictions can also refer to Principle 28 of the 2017 IOSCO Objectives and Principles of Securities Regulation, and take into account the outcomes of any recent FSAP/ROSC assessment against those Principles.

3. Enhancing counterparty risk management

G20/FSB Recommendations

Supervisors should require that institutions which have hedge funds as their counterparties have effective risk management, including mechanisms to monitor the funds' leverage and set limits for single counterparty exposures. (London)

Supervisors will strengthen their existing guidance on the management of exposures to leveraged counterparties. (Rec. II.17, FSF 2008)

Implementation of this recommendation was reported to be completed by all FSB jurisdictions in the 2018 IMN survey. Given this, the reporting of progress with respect to this recommendation will not be collected in the 2019 survey.

---	--------------------	-----	----	---	----	-----	------	----	---

4. Strengthening of regulatory and capital framework for monolines

G20/FSB Recommendations

Insurance supervisors should strengthen the regulatory and capital framework for monoline insurers in relation to structured credit. (Rec II.8, FSF 2008)

Implementation of this recommendation was reported to be completed by all FSB jurisdictions in the 2016 IMN survey. Given this, the reporting of progress with respect to this recommendation will not be collected in the 2019 survey.

I II. Securitisation III IV V VI VII VIII IX X

5. Strengthening of supervisory requirements or best practices for investment in structured products

G20/FSB Recommendations

Regulators of institutional investors should strengthen the requirements or best practices for firms' processes for investment in structured products. (Rec II.18, FSF 2008)

Remarks

Jurisdictions should indicate the due diligence policies, procedures and practices applicable for investment managers when investing in structured finance instruments and other policy measures taken for strengthening best practices for investment in structured finance products.

Jurisdictions may reference IOSCO's report on [Good Practices in Relation to Investment Managers' Due Diligence When Investing in Structured Finance Instruments \(Jul 2009\)](#).

Jurisdictions may also refer to the Joint Forum report on [Credit Risk Transfer-Developments from 2005-2007 \(Jul 2008\)](#).

6. Enhanced disclosure of securitised products

G20/FSB Recommendations

Securities market regulators should work with market participants to expand information on securitised products and their underlying assets. (Rec. III.10-III.13, FSF 2008)

Remarks

Jurisdictions should indicate the policy measures and other initiatives taken in relation to enhancing disclosure of securitised products, including working with industry and other authorities to continue to standardise disclosure templates and considering measures to improve the type of information that investors receive.

See, for reference, IOSCO’s [Report on Principles for Ongoing Disclosure for Asset-Backed Securities \(Nov 2012\)](#), [Disclosure Principles for Public Offerings and Listings of Asset-Backed Securities \(Apr 2010\)](#) and [report on Global Developments in Securitisation Regulations \(November 2012\)](#), in particular recommendations 4 and 5.

7. Consistent, consolidated supervision and regulation of SIFIs

G20/FSB Recommendations

All firms whose failure could pose a risk to financial stability must be subject to consistent, consolidated supervision and regulation with high standards. (Pittsburgh)

Remarks

Jurisdictions should indicate: (1) whether they have identified domestic SIFIs and, if so, in which sectors (banks, insurers, other etc.); (2) whether the names of the identified SIFIs have been publicly disclosed; and (3) the types of policy measures taken for implementing consistent, consolidated supervision and regulation of the identified SIFIs.

Jurisdictions should not provide details on policy measures that pertain to higher loss absorbency requirements for G/D-SIBs, since these are monitored separately by the BCBS.

See, for reference, the following documents:

BCBS

- [Framework for G-SIBs \(Jul 2018\)](#)
- [Framework for D-SIBs \(Oct 2012\)](#)

IAIS

- [Global Systemically Important Insurers: Policy Measures \(Jul 2013\) and revised assessment methodology \(updated in June 2016\)](#)

8. Establishing supervisory colleges and conducting risk assessments

G20/FSB Recommendations

To establish the remaining supervisory colleges for significant cross-border firms by June 2009. (London)

We agreed to conduct rigorous risk assessment on these firms [G-SIFIs] through international supervisory colleges. (Seoul)

Implementation of this recommendation was reported to be completed by all FSB jurisdictions in the 2017 IMN survey. The BCBS and IAIS will be monitoring implementation progress in this area with respect to banks and insurers respectively.

I II III. Enhancing supervision IV V VI VII VIII IX X

9. Supervisory exchange of information and coordination

G20/FSB Recommendations

To quicken supervisory responsiveness to developments that have a common effect across a number of institutions, supervisory exchange of information and coordination in the development of best practice benchmarks should be improved at both national and international levels. (Rec V.7 , FSF 2008)

Enhance the effectiveness of core supervisory colleges. (FSB 2012)

Remarks

Jurisdictions should include any feedback received from recent FSAPs/ROSC assessments on the [September 2012](#) BCP 3 (Cooperation and collaboration) and BCP 14 (Home-host relationships). Jurisdictions should also indicate any steps taken since the last assessment in this area, particularly in response to relevant FSAP/ROSC recommendations.

Jurisdictions should describe any recent or planned regulatory, supervisory or legislative changes that contribute to the sharing of supervisory information (e.g. within supervisory colleges or via bilateral or multilateral MoUs).

10. Strengthening resources and effective supervision

G20/FSB Recommendations

We agreed that supervisors should have strong and unambiguous mandates, sufficient independence to act, appropriate resources, and a full suite of tools and powers to proactively identify and address risks, including regular stress testing and early intervention. (Seoul)

Supervisors should see that they have the requisite resources and expertise to oversee the risks associated with financial innovation and to ensure that firms they supervise have the capacity to understand and manage the risks. (FSF 2008)

Supervisory authorities should continually re-assess their resource needs; for example, interacting with and assessing Boards require particular skills, experience and adequate level of seniority. (Rec. 3, FSB 2012)

Remarks

Jurisdictions should indicate any steps taken on recommendations 1, 2, 3, 4 and 7 (i.e. supervisory strategy, engagement with banks, improvements in banks' IT and MIS, data requests, and talent management strategy respectively) in the FSB [thematic peer review report on supervisory frameworks and approaches to SIBs \(May 2015\)](#).

I II III. Enhancing supervision IV V VI VII VIII IX X

10. Strengthening resources and effective supervision

Progress to date	
<p>Issue is being addressed through</p> <p><input type="checkbox"/> Primary / Secondary legislation</p> <p><input type="checkbox"/> Regulation / Guidelines</p> <p><input checked="" type="checkbox"/> Other actions (such as supervisory actions)</p> <p>Short description of the content of the legislation/regulation/guideline/other actions</p> <p>Korea is not home to any G-SIB and only has designated four banking groups and one bank as D-SIBs. However, the FSS can't agree more that effective supervision remains a core priority for supervisory authorities, and it can be attained through articulation of supervisory strategy, engagement with banks, improvements in banks' IT and MIS, well-communicated data requests, and retention of high-quality resources.</p> <p>First, for the articulation of supervisory strategy, the FSS distributes press release of the supervisory strategy and priorities on an annual basis, and hold presentations on details for financial industry, research institutions, consumer organizations, and other financial participants. During the year and at the end of the year, the FSS check the progress and accomplishment of the detailed tasks under the strategy and priorities to assure coherency between the strategy and actual supervisory outcomes.</p> <p>Second, for the engagement with banks, supervisors maintain sufficiently frequent contacts as appropriate with senior management of banks to develop an understanding of and assess matters such as strategy, group structure, corporate governance, performance, capital adequacy, liquidity, asset quality, risk management systems, and internal controls. For example, FSS senior management holds "partnership meeting" with banks' senior management prior to the full-scope on-site examination to discuss current issues and vulnerable areas. Besides, particular issues causing supervisory concerns can also trigger meetings with banks' senior management such as CEO, CFO, CRO etc. around the year.</p> <p>Thirdly, for improvements in banks' IT and MIS to provide robust and timely information on the banks' risk, Korea's legislation requires banks to carry out Internal Capital Adequacy Assessment Process (ICAAP), and sets forth specific provisions relating to governance including the obligations of the board and the management, monitoring and reporting, and independent control mechanisms. Supervisors evaluate banks for their internal capital adequacy assessment and risk management system, and reflect the results of the evaluation in its examination and supervision.</p> <p>Fourth, for well-communicated data requests, the FSS maintains an integrated financial information and analysis system to collect and manage data from the banks both on a monthly and a quarterly basis. Supervisors provide reporting instructions that clearly describe the purpose and the intent, in writing, included in the reports forms. When necessary, the FSS holds presentations on how to create a report for the employees of banks in charge of reporting to support more timely and accurate data collection. For the other data requests than regular reports, those requests should clearly demonstrate the data purpose out of prudential supervision, business behavior supervision, consumer protection, examination, inspection, etc., and the usage purpose after checking the duplication with previous data requests.</p>	<p>If this recommendation has not yet been fully implemented, please provide reasons for delayed implementation</p>

I	II	III. Enhancing supervision	IV	V	VI	VII	VIII	IX	X
---	----	----------------------------	----	---	----	-----	------	----	---

10. Strengthening resources and effective supervision

Update and next steps

Highlight main developments since last year's survey

As technology in the financial industry gets more important than ever, the FSS as a financial regulator has been putting efforts in staying abreast with technological advances and setting the appropriate supervision direction.

The FSS conducted reorganization in February 2018 and created two new units. One is Financial Supervision Research Center in charge of developing supervisory measures based on behavioral finance and big data analysis. The other one is Fintech Support Office responsible for promoting technology start-ups and the fintech industry. In addition, the FSS set up a team of fintech advisors in May 2017 to provide on-site consulting to fintech companies on financial regulation, internal controls, and compliance. In particular, the FSS has been focusing our consulting on promising technology start-ups that are in need of specialized legal and regulatory consulting but are unable to afford it on their own.

However, the promises that the fintech industry holds such as enhanced efficiency in economic systems come with risks as well. So, the FSS has been not only facilitating fintech for its potential benefits, at the same time has been tackling new challenges that it can create.

Firstly, realizing that consumers are more likely to be at a disadvantage compared with fintech companies because of information asymmetry, the FSS has been focusing more on consumer protection. The FSS recently had several instances of P2P (peer-to-peer) platform operators committing fraud and theft in Korea, and is working closely with the law enforcement authorities such as the FSC, Ministry of Justice, Korean National Police Agency and coordinating our actions with them to help protect investors.

Secondly, with respect to cryptocurrency trading, one of our priorities has been to prevent cryptocurrency from becoming a channel for money laundering or terror financing. So since January 2018, we have instituted the account holder verification requirement for cryptocurrency trading and issued guidelines on anti-money laundering in relation to cryptocurrency. In order to prevent regulatory arbitrage and protect consumers, we also imposed a complete ban on ICOs. +

11. Establishing regulatory framework for macro-prudential oversight

G20/FSB Recommendations

Amend our regulatory systems to ensure authorities are able to identify and take account of macro-prudential risks across the financial system including in the case of regulated banks, shadow banks and private pools of capital to limit the build up of systemic risk. (London)

Ensure that national regulators possess the powers for gathering relevant information on all material financial institutions, markets and instruments in order to assess the potential for failure or severe stress to contribute to systemic risk. This will be done in close coordination at international level in order to achieve as much consistency as possible across jurisdictions. (London)

Remarks

Please describe major changes in the institutional arrangements for macroprudential policy (structures, mandates, powers, reporting etc.) that have taken place in your jurisdiction since the global financial crisis.

Please indicate whether an assessment has been conducted with respect to the adequacy of powers to collect and share relevant information among national authorities on financial institutions, markets and instruments to assess the potential for systemic risk. If so, please describe identified gaps in the powers to collect information, and whether any follow-up actions have been taken.

12. Enhancing system-wide monitoring and the use of macro-prudential instruments

G20/FSB Recommendations

Authorities should use quantitative indicators and/or constraints on leverage and margins as macro-prudential tools for supervisory purposes. Authorities should use quantitative indicators of leverage as guides for policy, both at the institution-specific and at the macro-prudential (system-wide) level. (Rec. 3.1, FSF 2009)

We are developing macro-prudential policy frameworks and tools to limit the build-up of risks in the financial sector, building on the ongoing work of the FSB-BIS-IMF on this subject. (Cannes)

Authorities should monitor substantial changes in asset prices and their implications for the macro economy and the financial system. (Washington)

Remarks

Please describe at a high level (including by making reference to financial stability or other reports, where available) the types of methodologies, indicators and tools used to assess systemic risks.

Please indicate the use of tools for macroprudential purposes over the past year, including: the objective for their use; the process to select, calibrate and apply them; and the approaches used to assess their effectiveness.

12. Enhancing system-wide monitoring and the use of macro-prudential instruments

Progress to date	
<p>Issue is being addressed through</p> <ul style="list-style-type: none"> <input checked="" type="checkbox"/> Primary / Secondary legislation <input checked="" type="checkbox"/> Regulation / Guidelines <input checked="" type="checkbox"/> Other actions (such as supervisory actions) <p>Short description of the content of the legislation/regulation/guideline/other actions</p> <p>(EWS) The FSC cooperates with relevant organizations including the FSS and MOSF for close monitoring of changes in asset prices and continuous examination of the impact of changes in asset prices to financial system and macro-economy. Since 2012, Korea has enhanced major quantitative indicators relating to financial market to ensure effective EWS. Moreover, the authorities are using financial EWS, with strengthened qualitative assessment of major financial markets and financial risk factors (e.g. private debt) as pre-emptive tools for assessing macro-prudence. Since March 2013, the members of Macroeconomic Financial Meeting review on a quarterly basis the macroprudential indicators developed in view to early identification of risk factors including EWS. Macro-prudence is reviewed in two parts (i.e. macro-structural prudence and economic agents prudence) so that issues and problems could be identified in advance, in mid-to-long term perspective.</p> <p>(Financial Stability Report) Lastly, macro-prudential review framework has become more sophisticated by requiring the BOK to publish macro-financial stability report at least twice a year in accordance with the 8th revised BOK Act effective from 2011.</p> <p>(LTV/DTI) FSC/FSS introduced LTV and DTI in 2002 and in 2005 respectively as micro and macro-prudential supervision tools. FSC/FSS can modify the ratio of LTV and DTI considering overheating/shrink of the real estate market.</p> <p>(CCyB) FSC/FSS amended the Regulation on Supervision of Banking Business to establish a regulatory basis for CCyB in December 2015. FSC/FSS conduct the quarterly review based on analyses on several indicators such as credit-to-GDP ratio, bank resilience, and system-wide risk possibility. At present, the buffer rate is set at 0%, which took effect from 31-03-2016.</p>	<p>If this recommendation has not yet been fully implemented, please provide reasons for delayed implementation</p>

I	II	III	IV	V. Improving oversight of credit rating agencies (CRAs)					VI	VII	VIII	IX	X
---	----	-----	----	---------------------------------------------------------	--	--	--	--	----	-----	------	----	---

13. Enhancing regulation and supervision of CRAs

G20/FSB Recommendations

All CRAs whose ratings are used for regulatory purposes should be subject to a regulatory oversight regime that includes registration. The regulatory oversight regime should be established by end 2009 and should be consistent with the IOSCO Code of Conduct Fundamentals. (London)

National authorities will enforce compliance and require changes to a rating agency's practices and procedures for managing conflicts of interest and assuring the transparency and quality of the rating process.

CRAs should differentiate ratings for structured products and provide full disclosure of their ratings track record and the information and assumptions that underpin the ratings process.

The oversight framework should be consistent across jurisdictions with appropriate sharing of information between national authorities, including through IOSCO. (London)

Regulators should work together towards appropriate, globally compatible solutions (to conflicting compliance obligations for CRAs) as early as possible in 2010. (FSB 2009)

We encourage further steps to enhance transparency and competition among credit rating agencies. (St Petersburg)

Implementation of this recommendation was reported to be completed by all FSB jurisdictions in the 2018 IMN survey. Given this, the reporting of progress with respect to this recommendation will not be collected in the 2019 survey.

I II III IV V. Improving oversight of credit rating agencies (CRAs) VI VII VIII IX X

14. Reducing the reliance on ratings

G20/FSB Recommendations

We also endorsed the FSB’s principles on reducing reliance on external credit ratings. Standard setters, market participants, supervisors and central banks should not rely mechanistically on external credit ratings. (Seoul)

Authorities should check that the roles that they have assigned to ratings in regulations and supervisory rules are consistent with the objectives of having investors make independent judgment of risks and perform their own due diligence, and that they do not induce uncritical reliance on credit ratings as a substitute for that independent evaluation. (Rec IV. 8, FSF 2008)

We reaffirm our commitment to reduce authorities’ and financial institutions’ reliance on external credit ratings, and call on standard setters, market participants, supervisors and central banks to implement the agreed FSB principles and end practices that rely mechanistically on these ratings. (Cannes)

We call for accelerated progress by national authorities and standard setting bodies in ending the mechanistic reliance on credit ratings and encourage steps that would enhance transparency of and competition among credit rating agencies. (Los Cabos)

We call on national authorities and standard setting bodies to accelerate progress in reducing reliance on credit rating agencies, in accordance with the FSB roadmap. (St Petersburg)

Remarks

Jurisdictions should indicate the steps they are taking to address the recommendations of the [May 2014 FSB thematic peer review report on the implementation of the FSB Principles for Reducing Reliance on Credit Ratings](#), including by implementing their [agreed action plans](#). Any revised action plans should be sent to the FSB Secretariat so that it can be posted on the FSB website.

Jurisdictions may refer to the following documents:

14. Reducing the reliance on ratings

Progress to date	
<p>Issue is being addressed through</p> <p><input type="checkbox"/> Primary / Secondary legislation</p> <p><input checked="" type="checkbox"/> Regulation / Guidelines</p> <p><input type="checkbox"/> Other actions (such as supervisory actions)</p> <p>Short description of the content of the legislation/regulation/guideline/other actions</p> <p>In relation to banking sector, Korea has the CRA-rating related provisions in its regulation and detailed regulation on supervision of banking business. The provisions were created for the purpose of adopting the Basel standards (the pillar 1 and 3). In compliance with the pillar 1 adopted, the standardised approach using banks are obligated to use the CRA ratings for the measurement of risk weighted assets. And in accordance with the pillar 3 adopted, the banks are responsible for disclosing information on how they are managing risks; the information includes the names of CRAs and how the CRA ratings are mapped into the Basel standards. Since all the CRA-rating related provisions are designed to comply with the Basel standards, reducing further the reliance on CRA ratings in Korea may have to involve the change in the Basel standards.</p>	<p>If this recommendation has not yet been fully implemented, please provide reasons for delayed implementation</p>

I II III IV V. Improving oversight of credit rating agencies (CRAs) VI VII VIII IX X

14. Reducing the reliance on ratings

Update and next steps

Highlight main developments since last year's survey

Banks do not use CRA ratings for their credit assessment purpose. Reference to CRA ratings remain only within the implementation of the standardized approach of the Basel regulation with which banks are obligated to use the CRA ratings for the measurement of risk-weighted assets. In this regard, Basel. revisions to the standardized approach for credit risk enhance the regulatory framework by reducing mechanistic reliance on CRA ratings, by requiring banks to conduct sufficient due diligence, and by developing a sufficiently granular non-ratings-based approach for jurisdictions that cannot or do not wish to rely on external credit ratings. Korea will enhance the bank's due diligence for using the CRA ratings implementing the revisions. In addition, as a member of international standard setters like BCBS, IOSCO and IAIS, Korea will actively participate in international discussion on this area and review domestic regulations according to the discussion.

In order to support banks' implementation of the revisions to the Standardized Approach for credit risk, FSS proactively published the draft regulation on April 2019 and held a conference for explaining new regulation.

Planned actions (if any) and expected commencement date

BCBS concluded final revisions to the Standardized Approach for credit risk in Dec 2017, and FSS will implement the Standardized Approach for credit risk by Jan 2022 in accordance with global implementation schedule

I II III IV V VI. Enhancing and aligning accounting standards VII VIII IX X

15. Consistent application of high-quality accounting standards

G20/FSB Recommendations

Regulators, supervisors, and accounting standard setters, as appropriate, should work with each other and the private sector on an ongoing basis to ensure consistent application and enforcement of high-quality accounting standards. (Washington)

Remarks

Jurisdictions should indicate the accounting standards that they follow and whether (and on what basis) they are of a high and internationally acceptable quality (e.g. equivalent to IFRSs as published by the IASB), and provide accurate and relevant information on financial position and performance. They should also explain the system they have for enforcement of consistent application of those standards.

Jurisdictions may want to refer to their jurisdictional profile prepared by the IFRS Foundation, which can be accessed at: <http://www.ifrs.org/Use-around-the-world/Pages/Analysis-of-the-G20-IFRS-profiles.aspx>.

As part of their response on this recommendation, jurisdictions should indicate the policy measures taken for appropriate application of fair value recognition, measurement and disclosure.

In addition, jurisdictions should set out any steps they intend to take (if appropriate) to foster transparent and consistent implementation of the new accounting requirements for the measurement of expected credit losses on financial assets that are being introduced by the IASB and FASB.

See, for reference, the following BCBS documents:

- [Supervisory guidance for assessing banks' financial instrument fair value practices \(Apr 2009\)](#)
- [Guidance on credit risk and accounting for expected credit losses \(Dec 2015\)](#)

16. Enhancing guidance to strengthen banks' risk management practices, including on liquidity and foreign currency funding risks

G20/FSB Recommendations

Regulators should develop enhanced guidance to strengthen banks' risk management practices, in line with international best practices, and should encourage financial firms to re-examine their internal controls and implement strengthened policies for sound risk management. (Washington)

National supervisors should closely check banks' implementation of the updated guidance on the management and supervision of liquidity as part of their regular supervision. If banks' implementation of the guidance is inadequate, supervisors will take more prescriptive action to improve practices. (Rec. II.10, FSF 2008)

Regulators and supervisors in emerging markets will enhance their supervision of banks' operation in foreign currency funding markets. (FSB 2009)

We commit to conduct robust, transparent stress tests as needed. (Pittsburgh)

Remarks

Jurisdictions should indicate the measures taken in the following areas:

- guidance to strengthen banks' risk management practices, including BCBS good practice documents ([Corporate governance principles for banks](#), [External audit of banks](#), and the [Internal audit function in banks](#));
- measures to monitor and ensure banks' implementation of the BCBS [Principles for Sound Liquidity Risk Management and Supervision \(Sep 2008\)](#);
- measures to supervise banks' operations in foreign currency funding markets;¹ and
- extent to which they undertake stress tests and publish their results.

Jurisdictions should not provide any updates on the implementation of Basel III liquidity requirements (and other recent standards such as capital requirements for CCPs), since these are [monitored separately by the BCBS](#).

¹ Only the emerging market jurisdictions that are members of the FSB should respond to this specific recommendation.

17. Enhanced risk disclosures by financial institutions

G20/FSB Recommendations

Financial institutions should provide enhanced risk disclosures in their reporting and disclose all losses on an ongoing basis, consistent with international best practice, as appropriate. (Washington)

We encourage further efforts by the public and private sector to enhance financial institutions' disclosures of the risks they face, including the ongoing work of the Enhanced Disclosure Task Force. (St. Petersburg)

Remarks

Jurisdictions should indicate the status of implementation of the disclosures requirements of IFRSs (in particular IFRS 7 and 13) or equivalent. Jurisdictions may also use as reference the recommendations of the October 2012 report by the Enhanced Disclosure Task Force on [Enhancing the Risk Disclosures of Banks](#) and [Implementation Progress Report by the EDTF \(Dec 2015\)](#), and set out any steps they have taken to foster adoption of the EDTF Principles and Recommendations.

In addition, in light of the new IASB and FASB accounting requirements for expected credit loss recognition, jurisdictions should set out any steps they intend to take (if appropriate) to foster disclosures needed to fairly depict a bank's exposure to credit risk, including its expected credit loss estimates, and to provide relevant information on a bank's underwriting practices. Jurisdictions may use as reference the recommendations in the report by the Enhanced Disclosure Task Force on the [Impact of Expected Credit Loss Approaches on Bank Risk Disclosures \(Nov 2015\)](#), as well as the recommendations in Principle 8 of the BCBS [Guidance on credit risk and accounting for expected credit losses \(Dec 2015\)](#).

In their responses, jurisdictions should not provide information on the implementation of Basel III Pillar 3 requirements, since this is [monitored separately](#) by the BCBS.

18. Strengthening of national deposit insurance arrangements

G20/FSB Recommendations

National deposit insurance arrangements should be reviewed against the agreed international principles, and authorities should strengthen arrangements where needed. (Rec. VI.9, FSF 2008)

Remarks

Jurisdictions that have not yet adopted an explicit national deposit insurance system should describe their plans to introduce such a system.

All other jurisdictions should describe any significant design changes in their national deposit insurance system since the issuance of the revised IADI [Core Principles for Effective Deposit Insurance Systems](#) (November 2014).

In addition, jurisdictions should indicate if they have carried out a self-assessment of compliance (based on IADI’s 2016 [Handbook](#)) with the revised Core Principles:

- If so, jurisdictions should highlight the main gaps identified and the steps proposed to address these gaps;
- If not, jurisdictions should indicate any plans to undertake a self-assessment exercise.

Progress to date

Not applicable
 Applicable but no action envisaged at the moment
 Implementation ongoing
 Implementation completed as of 29.12.1995

If “Not applicable” or “Applicable but no action envisaged...” has been selected, please provide a brief justification

If “Implementation ongoing” has been selected, please specify

 Final rule (for part of the reform) in force since [redacted]

18. Strengthening of national deposit insurance arrangements

Progress to date	
<p>Issue is being addressed through</p> <ul style="list-style-type: none"> <input checked="" type="checkbox"/> Primary / Secondary legislation <input type="checkbox"/> Regulation / Guidelines <input type="checkbox"/> Other actions (such as supervisory actions) <p>Short description of the content of the legislation/regulation/guideline/other actions</p> <p>The FSB's Thematic DI Peer Review Report mentions Korea several times as a country with a generally good deposit insurance scheme and in compliance with best practices in this field. (No particular problem was identified.)</p> <p>Other actions: Depositor Protection Act as a main vehicle of deposit insurance scheme in Korea was enacted in December 1995.</p>	<p>If this recommendation has not yet been fully implemented, please provide reasons for delayed implementation</p>

18. Strengthening of national deposit insurance arrangements

Update and next steps

Highlight main developments since last year's survey

[Empty area for highlighting main developments]

Planned actions (if any) and expected commencement date

Revision of the Depositor Protection Act is under way with a view toward enhancing depositor protection and improving the efficiency of the deposit insurance system. The proposed revisions are as follows:

1. Mandating prompt deposit reimbursement in the event of a deposit-taking institution's failure and introducing a requirement for deposit-taking institutions to maintain depositor records at all times;
2. Newly including deposits in money market trust (MMT) accounts in the deposit insurance coverage;
3. Applying separate coverage to an individual's accounts in each of the participating institutions under a purchase and assumption (P&A) as is the case in financial institution mergers or conversions;
4. Prohibiting false use of terms like "deposit insurance" and establishing the legal basis for punishment;

19. Enhancing market integrity and efficiency

G20/FSB Recommendations

We must ensure that markets serve efficient allocation of investments and savings in our economies and do not pose risks to financial stability. To this end, we commit to implement initial recommendations by IOSCO on market integrity and efficiency, including measures to address the risks posed by high frequency trading and dark liquidity, and call for further work by mid-2012. (Cannes)

Remarks

Jurisdictions should indicate whether high frequency trading and dark pools exist in their national markets.

Jurisdictions should indicate the progress made in implementing the recommendations:

- in relation to dark liquidity, as set out in the IOSCO [Report on Principles for Dark Liquidity \(May 2011\)](#).
- on the impact of technological change in the IOSCO [Report on Regulatory Issues Raised by the Impact of Technological Changes on Market Integrity and Efficiency \(Oct 2011\)](#).
- on market structure made in the IOSCO Report on [Regulatory issues raised by changes in market structure \(Dec 2013\)](#).

19. Enhancing market integrity and efficiency

Progress to date	
<p>Issue is being addressed through</p> <p><input type="checkbox"/> Primary / Secondary legislation</p> <p><input checked="" type="checkbox"/> Regulation / Guidelines</p> <p><input type="checkbox"/> Other actions (such as supervisory actions)</p> <p>Short description of the content of the legislation/regulation/guideline/other actions</p> <p>Risk Management Guideline for Algorithmic Trading of KRX. It consists of 5 main parts.</p> <ol style="list-style-type: none"> 1. Designing Member's Systems. Members' algorithmic trading systems should be designed to be error-free and to ensure their orderly functioning, preventing any market disruption and financial loss. 2. Testing Member's Systems. Members' algorithmic trading systems should be sufficiently tested to prevent errors of member's systems, which are often attributed to algorithmic trading incidents. 3. Risk Management. Members should meet regulatory requirements including those on management of their algorithmic trading, routing clients' algorithmic trading orders through the security device, and checking validity of the quotes. 4. Initiating Algorithmic Trading, Responding to Incidents and Validation after Incidents. It is important to put in place safeguards to enhance the internal risk controls, including validation upon the initiation of the algorithmic trading systems and programs, deploying a process to respond to incidents or errors and conducting periodic checks. 5. FEP(Front End Processor) Controls by Members. The FEP should be managed and operated by members. Because allowing their clients to manage the FEP and processing client's trade orders preferentially via separate systems or facilities, is risky and prohibited by regulation. <p>According to the guideline, letting the client's trade orders bypass the security device of the member's system is examined by the Market Oversight Commission. Regarding dark pools, it does not exist in Korea.</p>	<p>If this recommendation has not yet been fully implemented, please provide reasons for delayed implementation</p> <div style="background-color: #e0e0e0; height: 100px; width: 100%;"></div>

20. Regulation and supervision of commodity markets

G20/FSB Recommendations

We need to ensure enhanced market transparency, both on cash and financial commodity markets, including OTC, and achieve appropriate regulation and supervision of participants in these markets. Market regulators and authorities should be granted effective intervention powers to address disorderly markets and prevent market abuses. In particular, market regulators should have, and use formal position management powers, including the power to set ex-ante position limits, particularly in the delivery month where appropriate, among other powers of intervention. We call on IOSCO to report on the implementation of its recommendations by the end of 2012. (Cannes)

We also call on Finance ministers to monitor on a regular basis the proper implementation of IOSCO's principles for the regulation and supervision on commodity derivatives markets and encourage broader publishing and unrestricted access to aggregated open interest data. (St. Petersburg)

Remarks

Jurisdictions should indicate whether commodity markets of any type exist in their national markets.

Jurisdictions should indicate the policy measures taken to implement the principles found in IOSCO's report on [Principles for the Regulation and Supervision of Commodity Derivatives Markets \(Sep 2011\)](#).

Jurisdictions, in responding to this recommendation, may also make use of the responses contained in the [update to the survey](#) published by IOSCO in September 2014 on the principles for the regulation and supervision of commodity derivatives markets.

Progress to date

- Not applicable
- Applicable but no action envisaged at the moment
- Implementation ongoing
- Implementation completed as of 30.04.2013

If "Not applicable" or "Applicable but no action envisaged..." has been selected, please provide a brief justification

If "Implementation ongoing" has been selected, please specify

- Draft in preparation, expected publication by [redacted]
- Draft published as of [redacted]

20. Regulation and supervision of commodity markets

Progress to date	
<p>Issue is being addressed through</p> <ul style="list-style-type: none"> <input checked="" type="checkbox"/> Primary / Secondary legislation <input checked="" type="checkbox"/> Regulation / Guidelines <input type="checkbox"/> Other actions (such as supervisory actions) <p>Short description of the content of the legislation/regulation/guideline/other actions</p> <p>After the amendment of Capital Market Act, Korea regulates market price manipulation not only market derivatives but also OTC derivatives. The Act also prohibits various actions in the connection with trading listed securities or derivatives as well. Actions that cause fluctuation in, or fixing the market price of derivatives or underlying assets of certain derivatives or securities securities linked to certain securities, derivatives with same or similar underlying asset to certain derivatives with an intention to earn, or cause a third party to earn unjust profits from trading such instruments. KRX regulation also requires customers to deposit customer margin with the member firms before placing an order to protect customers from cases of insolvency or financial instability among member firms. Moreover, 3 phases are set for the activation of Circuit Breaker according to the market condition. Constant monitoring of the commodity market is also done by Market Oversight Regulation.</p>	<p>If this recommendation has not yet been fully implemented, please provide reasons for delayed implementation</p>

21. Reform of financial benchmarks

G20/FSB Recommendations

We support the establishment of the FSB's Official Sector Steering Group to coordinate work on the necessary reforms of financial benchmarks. We endorse IOSCO's Principles for Financial Benchmarks and look forward to reform as necessary of the benchmarks used internationally in the banking industry and financial markets, consistent with the IOSCO Principles. (St. Petersburg)

Collection of information on this recommendation will continue to be deferred given the ongoing reporting of progress in this area by the FSB Official Sector Steering Group, and ongoing IOSCO work to review the implementation of the IOSCO Principles for Financial Benchmarks.

22. Enhancing financial consumer protection

G20/FSB Recommendations

We agree that integration of financial consumer protection policies into regulatory and supervisory frameworks contributes to strengthening financial stability, endorse the FSB report on consumer finance protection and the high level principles on financial consumer protection prepared by the OECD together with the FSB. We will pursue the full application of these principles in our jurisdictions. (Cannes)

Remarks

Jurisdictions should describe progress toward implementation of the OECD’s [G-20 high-level principles on financial consumer protection \(Oct 2011\)](#).

Jurisdictions may refer to OECD’s [September 2013 and September 2014 reports](#) on effective approaches to support the implementation of the High-level Principles as well as the [G20/OECD Policy Guidance on Financial Consumer Protection in the Digital Age](#), which provides additional effective approaches for operating in a digital environment. The effective approaches are of interest across all financial services sectors – banking and credit; securities; insurance and pensions – and consideration should be given to their cross-sectoral character when considering implementation. In the case of private pensions, additional guidance can be found in the [Good Practices on the Role of Pension Supervisory Authorities in Consumer Protection Related to Private Pension Systems](#)

Jurisdictions should, where necessary, indicate any changes or additions that have been introduced as a way to support the implementation of the High-level Principles, to address particular national terminology, situations or determinations.
