List of abbreviations used
Sources of recommendations
List of contact persons from the FSB and standard-setting bodies

National authorities from FSB member jurisdictions should complete the survey and submit it to the FSB Secretariat (imn@fsb.org) by Friday, 12 July (representing the most recent status at that time). The Secretariat is available to answer any questions or clarifications that may be needed on the survey. Please also provide your contact details for the person(s) completing the survey and an index of abbreviations used in the response.

National authorities are expected to submit the information to the FSB Secretariat using the Adobe Acrobat version of the survey. The Microsoft Word version of the survey is also being circulated to facilitate the preparation/collection of survey responses by relevant authorities within each jurisdiction.

Jurisdictions that previously reported implementation as completed in a particular recommendation are not required to include information about progress to date, main developments since last year’s survey or future plans. Revisions to previously included text or descriptions of relevant developments and new reforms to enhance the existing framework in that area can be made as needed, but this is optional and should not lead to a downgrade from implementation completed to ongoing, unless these reverse previously implemented reforms. Jurisdictions that do not report implementation as completed are required to include full information both in the “Progress to date” and “Update and next steps” tables.

As with previous IMN surveys, the contents of this survey for each national jurisdiction will be published on the FSB’s website. Such publication is planned at around the time of the October 2019 G20 Finance Ministers and Central Bank Governors meeting. The FSB Secretariat will contact member jurisdictions in advance to check for any updates or amendments to submitted responses before they are published.
I. Hedge funds

1. Registration, appropriate disclosures and oversight of hedge funds

G20/FSB Recommendations

We also firmly recommitted to work in an internationally consistent and non-discriminatory manner to strengthen regulation and supervision on hedge funds.

(Seoul)

Hedge funds or their managers will be registered and will be required to disclose appropriate information on an ongoing basis to supervisors or regulators, including on their leverage, necessary for assessment of the systemic risks they pose individually or collectively. Where appropriate registration should be subject to a minimum size. They will be subject to oversight to ensure that they have adequate risk management.

(London)

Implementation of this recommendation was reported to be completed by all FSB jurisdictions in the 2016 IMN survey. Given this, the reporting of progress with respect to this recommendation will not be collected in the 2019 survey.
G20/FSB Recommendations
We ask the FSB to develop mechanisms for cooperation and information sharing between relevant authorities in order to ensure effective oversight is maintained when a fund is located in a different jurisdiction from the manager. We will, cooperating through the FSB, develop measures that implement these principles by the end of 2009. (London)

Remarks
Jurisdictions should indicate the progress made in implementing recommendation 6 in IOSCO’s Report on Hedge Fund Oversight (Jun 2009) on sharing information to facilitate the oversight of globally active fund managers.

In addition, jurisdictions should state whether they are:
- Signatory to the IOSCO MMoU in relation to cooperation in enforcement
- Signatory to bilateral agreements for supervisory cooperation that cover hedge funds and are aligned to the 2010 IOSCO Principles Regarding Cross-border Supervisory Cooperation.

Jurisdictions can also refer to Principle 28 of the 2017 IOSCO Objectives and Principles of Securities Regulation, and take into account the outcomes of any recent FSAP/ROSC assessment against those Principles.

Progress to date
- Not applicable
- Applicable but no action envisaged at the moment
- Implementation ongoing
- Implementation completed as of 16.02.2015

If “Not applicable” or “Applicable but no action envisaged…” has been selected, please provide a brief justification

If “Implementation ongoing” has been selected, please specify
- Draft in preparation, expected publication by
- Draft published as of
- Final rule or legislation approved and will come into force on
- Final rule (for part of the reform) in force since

Short description of the content of the legislation/regulation/guideline/other actions

The Bank of Russia can share information with foreign regulators according to Article 51.1 of the Federal Law No. 86-FZ "On the Central Bank of the Russian Federation (Bank of Russia)" of 10/07/2002. The Bank of Russia can share information on the basis of international treaties, bilateral agreements and IOSCO MMoU. The Bank of Russia has become a signatory to the IOSCO MMoU on 16/02/2015. Currently the Bank of Russia has a comprehensive system of bilateral MoUs with financial market authorities from different countries.

If this recommendation has not yet been fully implemented, please provide reasons for delayed implementation.
### II. Establishment of international information sharing framework

#### Update and next steps

<table>

### 3. Enhancing counterparty risk management

**G20/FSB Recommendations**

Supervisors should require that institutions which have hedge funds as their counterparties have effective risk management, including mechanisms to monitor the funds’ leverage and set limits for single counterparty exposures. (London)

Supervisors will strengthen their existing guidance on the management of exposures to leveraged counterparties. (Rec. II.17, FSB 2008)

---

Implementation of this recommendation was reported to be completed by all FSB jurisdictions in the 2018 IMN survey. Given this, the reporting of progress with respect to this recommendation will not be collected in the 2019 survey.
### 4. Strengthening of regulatory and capital framework for monolines

**G20/FSB Recommendations**

*Insurance supervisors should strengthen the regulatory and capital framework for monoline insurers in relation to structured credit.* (Rec II.8, FSB 2008)

| Implementation of this recommendation was reported to be completed by all FSB jurisdictions in the 2016 IMN survey. Given this, the reporting of progress with respect to this recommendation will not be collected in the 2019 survey. |
G20/FSB Recommendations
Regulators of institutional investors should strengthen the requirements or best practices for firms’ processes for investment in structured products. (Rec II.18, FSF 2008)

Remarks
Jurisdictions should indicate the due diligence policies, procedures and practices applicable for investment managers when investing in structured finance instruments and other policy measures taken for strengthening best practices for investment in structured finance products.

Jurisdictions may reference IOSCO’s report on Good Practices in Relation to Investment Managers’ Due Diligence When Investing in Structured Finance Instruments (Jul 2009).

Jurisdictions may also refer to the Joint Forum report on Credit Risk Transfer—Developments from 2005-2007 (Jul 2008).

Short description of the content of the legislation/regulation/guideline/other actions

Requirements to the structure and composition of joint-stock investment funds and unit investment funds assets are imposed by Federal Law No. 156-FZ 'On Investment Funds' of 29/11/2001 and normative acts of the Bank of Russia. Securities listing rules and the procedure for public offering and trading of securities issued by foreign issuers in the Russian Federation are set by the Federal Law No. 39-FZ 'On the Securities Market' of 22/04/1996 - as amended. Regulation of the Bank of Russia No. 534-P 'Regulation on Admission of Securities to the Organized Trading' of 24/02/2016 (in force from 15/05/2016) stipulates rules of the admission to the organized securities market. Federal Law No. 46-FZ 'On the Protection of Rights and Legitimate Interests of Investors on the Securities Market' of 05/03/1999 sets restrictions on securities trading. Federal Law No. 111-FZ 'On Investment of Funds to Finance the Accumulative Pension in the Russian Federation' of 24/07/2002 sets a list of permitted assets for investing (investment objects). The Bank of Russia issued the following normative acts: - Direction No. 3289-U 'On the Requirements to the Procedure for Accounting of Claims Being Securities' Collateral and Cash Flows Credited to a Collateral Account' of 20/06/2014; Direction No. 4298-U 'On the Procedure for the Insurer's Own Funds (Capital) Investment and a List of the Eligible Assets' of 22/02/2017; - Regulation No. 451-P on establishment extra restrictions for investments of non-government pension funds (pension funds are restricted to pool retirement resources into assets that have certain long-term investment grade) of 25/12/2014 was abrogated by Regulation No. 580-P of 01/03/2017 (as amended) as well on establishment extra restrictions for investments of non-government pension funds (pension funds are restricted to pool retirement resources into assets that have certain long-term investment grade). Regulation of the Bank of Russia No. 482-P 'On Uniform Requirements for the Rules on Conducting Portfolio Management, for the Procedure for Disclosure of Information by an Asset Manager and on the Requirements Aimed at Avoidance of Conflict of Interest of an Asset Manager' of 03/08/2015 (in force from 03.01.2016) sets requirements for portfolio management and fund management for cases when securities and funds can be used in transactions with securities and/or meant for entering into derivative contracts. Bank of Russia Ordinance No.4129-U of 05/09/2016 (in force from 18/12/2016) laid down new requirements to asset composition and asset structure of joint-stock investment funds and unit investment funds and was amended by Bank of Russia Ordinance No. 4346-U of 06/04/2017 and Bank of Russia Ordinance No. 5143-U of 15/05/2019 (in force from 02/09/2019).

**Short description of the content of the legislation/regulation/guideline/other actions**

The Federal Law No. 39-FZ 'On the Securities Market' of 22/04/1996 stipulates conditions for securitization. The law contains provisions on two types of special-purpose companies (analogues to SPVs): special-purpose financial company and special-purpose project financing company, which buy and securitize claims. The Law envisages procedures for establishment, functioning and bankruptcy of such companies. The Federal Law No. 39-FZ ‘On the Securities Market’ also prescribes that the original creditors (i.e. originating banks) should retain at least 20% of risk of the underlying assets when originating securitization (10% for similar operations with the participation of a special-purpose project financing company). According to the Federal Law No. 152-FZ ‘On the Mortgage-Backed Securities’ of 11/11/2003 the Bank of Russia is entitled to set requirements for credit institutions issuing mortgage-backed securities to disclose information on their activities in addition to the requirements set by other federal laws. According to Federal Law No. 395-1 ‘On Banks and Banking activities’ of 02/12/1990 a credit organization is required to disclose information on the factoring transactions (including if the ceded claims are encumbered) carried out with mortgage agents and special-purpose companies.

The composition of the information, as well as the procedure for and timeframe for its disclosure were prescribed on a bank level under the Bank of Russia Ordinance No. 4638-U ‘On the Form, Procedure, and Terms for the Disclosure by Credit Institutions of Information on Their Activities' of 06/12/2017 which was abrogated and replaced by the Bank of Russia Ordinance No. 4983-U ‘On the Form, Procedure, and Terms for the Disclosure by Credit Institutions of Information on Their Activities' of 27/11/2018, and on a parent level under the Bank of Russia Ordinance No. 4481-U, dated 07/08/2017, ‘On the Rules and Timeframe for Parent Credit Institutions of Banking Groups to Disclose Information on Risks Assumed, Risk Assessment Procedures, Risk and Capital Management Procedures and on Financial Instruments Included in the Calculation of a Banking Group's Equity Capital' (effective from 01/01/2018).

Bank of Russia Regulation No. 454-P ‘On the Disclosure of Information by Issuers of Registrable Securities' of 30/12/2014 establishes the features of information disclosure by issuers of mortgage-backed bonds.

---

If this recommendation has not yet been fully implemented, please provide reasons for delayed implementation:

The securitization market in Russia is still developing. We address the developments basing on the best international practices.
### 6. Enhanced disclosure of securitised products

**Update and next steps**

<table>

III. Enhancing supervision

7. Consistent, consolidated supervision and regulation of SIFIs

G20/FSB Recommendations
All firms whose failure could pose a risk to financial stability must be subject to consistent, consolidated supervision and regulation with high standards. (Pittsburgh)

Remarks
Jurisdictions should indicate: (1) whether they have identified domestic SIFIs and, if so, in which sectors (banks, insurers, other etc.); (2) whether the names of the identified SIFIs have been publicly disclosed; and (3) the types of policy measures taken for implementing consistent, consolidated supervision and regulation of the identified SIFIs.

Jurisdictions should not provide details on policy measures that pertain to higher loss absorbency requirements for G/D-SIBs, since these are monitored separately by the BCBS.

See, for reference, the following documents:

BCBS
- Framework for G-SIBs (Jul 2018)
- Framework for D-SIBs (Oct 2012)

IAIS
- Global Systemically Important Insurers: Policy Measures (Jul 2013) and revised assessment methodology (updated in June 2016)
- IAIS SRMP guidance - FINAL (Dec 2013)
- Guidance on Liquidity management and planning (Oct 2014)

FSB

### Short description of the content of the legislation/regulation/guideline/other actions

Regulation on Russian systemically important banks (D-SIBs): - Bank of Russia Ordinance No. 3737-U 'On Methodology for Defining Systemically Important Credit Financial Institutions' of 22/07/2015 stipulates methodology for D-SIBs determination which is based on BCBS framework and takes into account peculiarities of national financial markets. Under this Ordinance, the Bank of Russia once a year identifies Russian D-SIBs. List of D-SIBs approved by the Bank of Russia in 2018 was disclosed on the official website of the Bank of Russia on 05/10/2018. The list includes eleven credit institutions which account for over 60% of total assets of Russian banking sector. The following policy measures have been taken: - creation of Systemically Important Banks Supervision Department which is in charge of direct supervision of D-SIBs; - additional prudential requirements on consolidated level are applied, - full application of Basel III for Russian D-SIBs - additional prudential requirements (capital adequacy surcharge for systemic importance, liquidity coverage ratio - LCR, net stable funding ratio - NSFR). Under the Bank of Russia Regulation No. 510-P dated 03/12/2015 'On the Procedure for Calculating the Liquidity Coverage Ratio (Basel III) by Systemically Important Credit Institutions' systemically important credit institutions are subject to the LCR requirements on a consolidated basis in line with BCBS's documents 'Basel III: The Liquidity Coverage Ratio and liquidity risk monitoring tools (January 2013)' and 'Principles for Sound Liquidity Risk Management and Supervision (September 2008)'. The methodology of the LCR under Regulation No. 510-P is based on Regulation No. 421-P with an additional specification of the consolidation, alternative options and supervisory issues. It introduces the LCR on a consolidated basis for banking groups of systemically important banks and on a standalone basis for those systemically important banks, which do not have a banking group to be met on an ongoing basis. The minimum LCR requirements (phase-in arrangements) are consistent with the Basle's ones and are as follows: 70% - starting from 01/01/2016; 80% - from 01/01/2017; 90% - from 01/01/2018; 100% - from 01/01/2019. Regulation No. 510-P includes 'Principles of Liquidity Risk Management' with requirements to the systemically important credit institutions to arrange their internal liquidity risk management in order to reduce possible liquidity risks. Supervisory reporting on the LCR by systemically important credit institutions is performed on monthly basis, or in the event of non-compliance with the minimum requirements (actual or expected) is made upon request of the Bank of Russia. The Bank of Russia issued Ordinance No. 5164-U of 06/10/2019 (in force from 06/10/2019) amending the methodology of the LCR calculation in order to align the methodology of the LCR calculation with the corresponding changes in the federal legislation (with regard to term savings certificates with no early withdrawal and the deposit insurance system coverage for legal entities that are treated as small business) and with FAQs, issued by the BCBS (e.g. with regard to the definition of secured funding). Under the Bank of Russia Regulation No. 596-P, dated 26/07/2017, 'On the Procedure for Systemically Important Credit Institutions to Calculate Structural Liquidity Ratio (Net Stable Funding Ratio) ('Basel III')' systemically important credit institutions are subject to the NSFR requirements on a consolidated basis in line with BCBS's documents 'Basel III: The Net Stable Funding Ratio (October 2014)'. The NSFR is introduced on a consolidated basis for banking groups of systemically important banks and on a standalone basis for those systemically important banks, which do not have a banking group to be met on an ongoing basis. The minimum NSFR requirement is consistent with the Basle's one and is set at 100%. Supervisory

8. Establishing supervisory colleges and conducting risk assessments

G20/FSB Recommendations

To establish the remaining supervisory colleges for significant cross-border firms by June 2009. (London)

We agreed to conduct rigorous risk assessment on these firms [G-SIFIs] through international supervisory colleges. (Seoul)

| Implementation of this recommendation was reported to be completed by all FSB jurisdictions in the 2017 IMN survey. The BCBS and IAIS will be monitoring implementation progress in this area with respect to banks and insurers respectively. |
### 9. Supervisory exchange of information and coordination

#### G20/FSB Recommendations

To quicken supervisory responsiveness to developments that have a common effect across a number of institutions, supervisory exchange of information and coordination in the development of best practice benchmarks should be improved at both national and international levels. (Rec V.7, FSB 2008)

*Enhance the effectiveness of core supervisory colleges.* (FSB 2012)

#### Remarks

Jurisdictions should include any feedback received from recent FSAPs/ROSC assessments on the **September 2012** BCP 3 (Cooperation and collaboration) and BCP 14 (Home-host relationships). Jurisdictions should also indicate any steps taken since the last assessment in this area, particularly in response to relevant FSAP/ROSC recommendations.

Jurisdictions should describe any recent or planned regulatory, supervisory or legislative changes that contribute to the sharing of supervisory information (e.g. within supervisory colleges or via bilateral or multilateral MoUs).

</tr>
<tr>
<td>☑ Other actions (such as supervisory actions)</td>
</tr>
</tbody>
</table>

**Short description of the content of the legislation/regulation/guideline/other actions**

The Bank of Russia can share information with foreign banking and financial regulators according to Article 51 and Article 51.1 of the Federal Law No. 86-FZ 'On the Central Bank of the Russian Federation (Bank of Russia)’ of 10/07/2002. Aiming at streamlining cooperation and information sharing, the Bank of Russia signed 40 bilateral agreements (memoranda of understanding - MoUs) for cooperation in banking supervision and information exchange, including the exchange of confidential information with central banks and other supervisory authorities of foreign states (jurisdictions) in charge of banking supervision. The agreements (MoUs) set the framework for cooperation and information sharing between home supervisors of head credit institutions (banks) of banking groups and host supervisors of credit institutions (banks) - participants in banking groups in the following areas: licensing process (issuance and revocation of licenses), compliance of executive managers and board members with established qualification requirements, ownership structure control, off-site supervision, on-site inspections, AML/CFT and cooperation in the course of financial resolution procedures.

The Bank of Russia can share information on the basis of international treaties, bilateral agreements, IOSCO MMoU and IAIS MMoU. The Bank of Russia became a signatory to the IOSCO MMoU on 16/02/2015 and to the IAIS MMoU on 26/01/2018. Currently the Bank of Russia has a comprehensive framework of bilateral MoUs with financial market/insurance authorities.

In particular, the Bank of Russia has bilateral MoUs for financial/insurance market regulators in insurance supervision with: FSMA of Belgium, FMA of Liechtenstein, FSC of the Republic of Korea, CMA of the Sultanate of Oman, BaFin, the State Service for Supervision and Regulation of the Financial Market of the Kyrgyz Republic, the National Association of Insurers Commissioners (NAIC) of the USA, the China Banking and Insurance Regulatory Commission (CBIRC) (successor to the China Insurance Regulation Commission (CIRC)), the Non-Bank Financial Institutions Regulatory Authority (NBFIRA) of the Republic of Botswana, the Financial Services Commission Mauritius, the National Bank of Kazakhstan (successor to the Agency of Kazakhstan on Regulation and Supervision of Financial Market and Financial Organizations), Financial Sector Conduct Authority of the Republic of South Africa (successor to the Financial Services Board of the Republic of South Africa), Financial Services Authority of Seychelles.

Other actions: In the course of BCP assessment for the Russian Federation in the framework of Financial Sector Assessment Program (FSAP) 2016 update BCP 3 (Cooperation and Collaboration) was evaluated as "Compliant", BCP13 (Home-host relationship) - as "Largely Compliant". In respect to Principle 3 it was recommended to establish a formal mechanism of cooperation with the French Supervisory and Resolution Authority (ASPR). Following this recommendation the Bank of Russia in October 2016 forwarded to ASPR a draft MoU in banking supervision. In respect to Principle 13 it was recommended: - to continue to foster college practices and conclude crisis management and recovery and resolution planning for internationally active banking groups; - to consider legislative amendments to remove the requirement for written consent from a bank to permit a foreign supervisory authority to have access to its offices. Following these recommendations: - the Bank of Russia Banking Supervision Department representatives took part on a regular basis in international supervisory colleges on OTP.

We continue developing the information sharing and coordination framework.

<td>In 2018 the Bank of Russia signed bilateral memoranda of understanding with Financial Services Commission Mauritius and Non-bank Financial Institutions Regulatory Authority of the Republic of Botswana. The MoUs cover cooperation and information sharing on both securities and insurance markets. The Bank of Russia also signed bilateral memorandum of understanding with the Republic of Serbia Securities Commission, which covers cooperation and information sharing on securities markets. In 2018 the Bank of Russia and the National Bank of Kazakhstan signed a new Agreement on Cooperation and Information Exchange in the field of financial market supervision. This overwhelming Agreement covers key sectors of the financial market and seeks to foster the further development of the institutional base for Russian and Kazakhstan’s bilateral relations in the financial sphere and collaboration between the Bank of Russia and the National Bank of Kazakhstan. The Agreement provides for the information exchange on the licensing of supervised entities, supervision over their day-to-day activities, countering malpractice in the financial market and execution of insolvency (bankruptcy) and financial rehabilitation procedures. The Agreement serves as a framework for the regulators to exchange information on organisational structure, ownership and management of supervised entities, and also on countering the legalisation of criminally obtained incomes and the financing of terrorism. The Agreement complies with the standards and principles of the Basel Committee on Banking Supervision (BCBS), the International Association of Insurance Supervisors (IAIS), the International Organisation of Securities Commissions (IOSCO) and FATF recommendations. In 2018 the Bank of Russia entered also into a Memorandum of Understanding (MoU) with the Dubai Financial Services Authority (DFSA). The document establishes arrangements for sharing supervisory information and enhancing cooperation in the area of banking supervision, anti-money laundering (AML) and counter-terrorist financing (CTF). In 2019 the Bank of Russia concluded a bilateral agreement on exchange of supervisory information with the Central Bank of</td>

10. Strengthening resources and effective supervision

G20/FSB Recommendations

We agreed that supervisors should have strong and unambiguous mandates, sufficient independence to act, appropriate resources, and a full suite of tools and powers to proactively identify and address risks, including regular stress testing and early intervention. (Seoul)

Supervisors should see that they have the requisite resources and expertise to oversee the risks associated with financial innovation and to ensure that firms they supervise have the capacity to understand and manage the risks. (FSF 2008)

Supervisory authorities should continually re-assess their resource needs; for example, interacting with and assessing Boards require particular skills, experience and adequate level of seniority. (Rec. 3, FSB 2012)

Remarks

Jurisdictions should indicate any steps taken on recommendations 1, 2, 3, 4 and 7 (i.e. supervisory strategy, engagement with banks, improvements in banks’ IT and MIS, data requests, and talent management strategy respectively) in the FSB thematic peer review report on supervisory frameworks and approaches to SIBs (May 2015).

III. Enhancing supervision

10. Strengthening resources and effective supervision

Progress to date

<table>
<thead>
<tr>
<th>Issue is being addressed through</th>
<th>✔ Primary / Secondary legislation</th>
<th>✔ Regulation / Guidelines</th>
<th>Other actions (such as supervisory actions)</th>
</tr>
</thead>
</table>

Short description of the content of the legislation/regulation/guideline/other actions

In the course of performance of the Bank of Russia's mega-regulator functions, supervisory practice acquired new opportunities to receive a broader spectrum of information on the activity of banks, banking groups, and financial conglomerates, concerning, among other things, operations between banks and other financial market participants. In 2016 the Bank of Russia started reorganisation of its supervisory activity to enhance its efficiency. In order to establish an efficient and unified system of ongoing supervision over regional credit institutions, the Bank of Russia develops a unified vertical structure of supervision. It implies that a supervision responsibility centre is created in the Bank of Russia Head Office to provide coordination, methodology, control, and analysis of supervision risks (Banking Supervision Department). It is also assumed that supervisory functions of all the Bank of Russia's regional divisions will be transferred to a newly established division in the Bank of Russia Head Office - the Service for Ongoing Banking Supervision. Thereby, the target model of current supervision includes the Banking Supervision Department - a centre for supervision framework, - the Systematically Important Banks Supervision Department and the Service for Ongoing Banking Supervision. The latter will carry out ongoing supervision of all banks other than systemically important ones. The activities of these departments will rely on the information provided by the Risk Analysis Service. The reorganisation process of banking supervision framework has been completed in 2018. The reorganization includes, inter alia, separating the risk assessment centre from the centre of supervisory decision-making a new unit - the Risk Analysis Service -was set up in the head office to assess assets and transactions of credit institutions (loans, guarantees, securities, letters of credit, shares in closed-end unit investment funds, financial derivatives, etc.) and publish the assessment outcomes in the centralised IT system. These assessments allow the supervisors to conduct a comprehensive analysis of a bank's activity, assess its financial position, and prepare proposals on the supervisory measures (if needed). Given its role as the single financial regulator and supervisor since 2013 and its financial stability mandate, the Bank of Russia has become the macroprudential authority. According to Federal Law No. 86-FZ ‘On the Central Bank of the Russian Federation (Bank of Russia)', which includes a chapter entitled "Development of Russian Financial Market and Ensuring its Stability", the Bank of Russia is entitled to: - elaborate and pursue, in collaboration with the government, the policy of developing and ensuring the stable functioning of the Russian financial market; - publish at least twice a year the Financial Stability Report (FSR); - monitor the Russian financial market, including for the purpose of detecting situations endangering financial stability; and - elaborate measures aimed at reducing threats to financial stability. Following the creation of the Financial Stability Department in 2011, the Bank of Russia established an internal Financial Stability Committee (FSCom) in 2014 to play a key coordinating role in macroprudential oversight, crisis management, and other financial stability issues. The Systemically Important Institutions Supervision Department was established in the Bank of Russia in October 2013 and is responsible for direct supervision of the largest Russian credit institutions and banking groups. In July 2013 National Council on Ensuring Financial Stability (FSC) was established by Russian Government as an advisory body on financial stability issues. The Ministry of Finance of the Russian Federation and the Ministry of Economic Development of the Russian Federation are federal governmental bodies responsible for ensuring financial stability. The FSC is an effective platform for inter-agency coordination.

If this recommendation has not yet been fully implemented, please provide reasons for delayed implementation

We indicated the status of recommendation 10 as "implementation ongoing" taking into consideration the following.

The Bank of Russia works on adjustment and constantly re-adjustment of regulation in established and new spheres based on the principles of proportionality to risks, with the focus on gradually transition from management guided by rules to management by principles. We are starting to gradually transition towards incentive-based regulation. We pay greater attention to systemic problems and risks, in particular, work on adopting the principle of...

11. Establishing regulatory framework for macro-prudential oversight

**G20/FSB Recommendations**

Amend our regulatory systems to ensure authorities are able to identify and take account of macro-prudential risks across the financial system including in the case of regulated banks, shadow banks and private pools of capital to limit the build up of systemic risk. (London)

Ensure that national regulators possess the powers for gathering relevant information on all material financial institutions, markets and instruments in order to assess the potential for failure or severe stress to contribute to systemic risk. This will be done in close coordination at international level in order to achieve as much consistency as possible across jurisdictions. (London)

**Remarks**

Please describe major changes in the institutional arrangements for macroprudential policy (structures, mandates, powers, reporting etc.) that have taken place in your jurisdiction since the global financial crisis.

Please indicate whether an assessment has been conducted with respect to the adequacy of powers to collect and share relevant information among national authorities on financial institutions, markets and instruments to assess the potential for systemic risk. If so, please describe identified gaps in the powers to collect information, and whether any follow-up actions have been taken.

**Short description of the content of the legislation/regulation/guideline/other actions**

As of 01.09.2013 the Bank of Russia became the mega-regulator entrusted with authority to regulate, control and supervise the Russian financial market. The Bank of Russia also received an explicit financial stability mandate provided in legislation. The revised Federal law ´On the Central Bank of the Russian Federation (Bank of Russia)´ empowered the Bank of Russia to monitor the financial system, identify risks to financial stability and develop measures to address them. The two bodies involved in macroprudential policy in Russia are the Bank of Russia and the National Council on Ensuring Financial Stability - FSC, established by Russian Government in July 2013. The Ministry of Finance of the Russian Federation and the Ministry of Economic Development of the Russian Federation were designated as federal governmental bodies responsible for ensuring financial stability.

In terms of their respective roles and responsibilities, the Bank of Russia has the legal mandate and most of the tools required for safeguarding financial stability, while the FSC is an inter-agency body with an advisory role, established to create a formal platform for exchanging views and ensuring effective coordination among different authorities that have stakes in financial stability.

Given its role as the single financial regulator and supervisor, the Bank of Russia has become the macroprudential authority and performs a leading role in the design and implementation of macroprudential policy. In November 2014 the Bank of Russia established a high-level internal Financial Stability Committee, chaired by the Governor, to formalize and further strengthen macroprudential policy decision making.

Russia / IMN Survey 2019
12. Enhancing system-wide monitoring and the use of macro-prudential instruments

G20/FSB Recommendations

Authorities should use quantitative indicators and/or constraints on leverage and margins as macro-prudential tools for supervisory purposes. Authorities should use quantitative indicators of leverage as guides for policy, both at the institution-specific and at the macro-prudential (system-wide) level. (Rec. 3.1, FSF 2009)

We are developing macro-prudential policy frameworks and tools to limit the build-up of risks in the financial sector, building on the ongoing work of the FSB-BIS-IMF on this subject. (Cannes)

Authorities should monitor substantial changes in asset prices and their implications for the macro economy and the financial system. (Washington)

Remarks

Please describe at a high level (including by making reference to financial stability or other reports, where available) the types of methodologies, indicators and tools used to assess systemic risks.

Please indicate the use of tools for macroprudential purposes over the past year, including: the objective for their use; the process to select, calibrate and apply them; and the approaches used to assess their effectiveness.

See, for reference, the following documents:

- FSB-IMF-BIS progress report to the G20 on Macroprudential policy tools and frameworks (Oct 2011)
- CGFS report on Operationalising the selection and application of macroprudential instruments (Dec 2012)
- IMF staff papers on Macroprudential policy, an organizing framework (Mar 2011), Key Aspects of Macroprudential policy (Jun 2013), and Staff Guidance on Macroprudential Policy (Dec 2014)
- CGFS report on Experiences with the ex ante appraisal of macroprudential instruments (Jul 2016)
- CGFS report on Objective-setting and communication of macroprudential policies (Nov 2016)

12. Enhancing system-wide monitoring and the use of macro-prudential instruments

Progress to date

| Issue is being addressed through |
|-------------------------|------------------|
| ✔ Primary / Secondary legislation |
| ✔ Regulation / Guidelines |
| ✔ Other actions (such as supervisory actions) |

Short description of the content of the legislation/regulation/guideline/other actions

The Bank of Russia mandate comprises powers to monitor the financial market of the Russian Federation and identify vulnerabilities threatening financial stability as well as develop measures aimed at addressing threats to financial stability. The Bank of Russia uses various macroprudential instruments, in particular: counter-cyclical capital buffer - from 01/01/2016, time-varying or dynamic provisioning, sectoral capital requirements (including capital risk weights), reserve requirement ratio, capital surcharge for systemically important credit institutions (since 01/01/2016), concentration limit, liquidity coverage ratio - LCR for systemically important credit institutions (since 01/01/2016), net stable funding ratio - NSFR for systemically important credit institutions (since 01/01/2018), other liquidity requirements, limits on open FX positions. In general macroprudential tools calibration is conducted by the Bank of Russia on individual basis (case-by-case approach). The decision on enforcement of macroprudential tools depends on the expected financial system consequences associated with the systemic risk. In recent years, CBR has used a number of macroprudential tools to deal with risks, mainly those stemming from retail lending. CBR has tightened provisioning requirements and increased capital risk weights to curb excessive growth of unsecured consumer lending, usefully helping to increase banks' ability to handle materialized credit risk. For mortgage lending, CBR has preemptively adopted differentiated capital risk weights based on loans' risk characteristics, with a view to containing risks associated with lending while supporting the extension of mortgage loans to creditworthy borrowers.

The Bank of Russia uses various quantitative indicators for the purposes of identification and monitoring systemic risks. The Bank of Russia twice a year publishes Financial Stability Review which contains analysis of systemic risks.

In March 2018 Federal Law No. 86-FZ "On the Central Bank of the Russian Federation (Bank of Russia)" was amended by the provisions which empowered the Bank of Russia to establish, as a means to reduce threats to financial stability in Russia, risk ratio surcharges for certain types of assets (macroprudential surcharges). Macroprudential surcharges can be differentiated depending on the values of the characteristic of the type of asset to be established by the Board of Directors of the Bank of Russia. The types of assets to which macroprudential surcharges can be applied as well as the characteristics of these types of assets shall be determined by the normative act of the Bank of Russia.

Macroprudential surcharges are taken into account when calculating the equity funds (capital) adequacy ratios of a credit institution (banking group).

The new macroprudential regulation mechanism of the Bank of Russia is in force from 8 October 2018. Bank of Russia Ordinance No. 4892-U, dated 31 August 2018, "On Types and Characteristics of Assets for Which Risk-based Capital Buffers are Set and on the Methodology for Applying These Buffers to the Said Types of Assets for Credit Institutions to Calculate Their Capital Adequacy Ratios" defines the list of assets to which macroprudential surcharges can be applied, describes characteristics of these assets and sets the procedure for macroprudential surcharges application for the purpose of calculation the capital adequacy ratios of banks.

We continue developing our system of macroprudential instruments.

13. Enhancing regulation and supervision of CRAs

**G20/FSB Recommendations**

All CRAs whose ratings are used for regulatory purposes should be subject to a regulatory oversight regime that includes registration. The regulatory oversight regime should be established by end 2009 and should be consistent with the IOSCO Code of Conduct Fundamentals. (London)

National authorities will enforce compliance and require changes to a rating agency’s practices and procedures for managing conflicts of interest and assuring the transparency and quality of the rating process.

CRAs should differentiate ratings for structured products and provide full disclosure of their ratings track record and the information and assumptions that underpin the ratings process.

The oversight framework should be consistent across jurisdictions with appropriate sharing of information between national authorities, including through IOSCO. (London)

Regulators should work together towards appropriate, globally compatible solutions (to conflicting compliance obligations for CRAs) as early as possible in 2010. (FSB 2009)

We encourage further steps to enhance transparency and competition among credit rating agencies. (St Petersburg)

Implementation of this recommendation was reported to be completed by all FSB jurisdictions in the 2018 IMN survey. Given this, the reporting of progress with respect to this recommendation will not be collected in the 2019 survey.
14. Reducing the reliance on ratings

G20/FSB Recommendations

We also endorsed the FSB’s principles on reducing reliance on external credit ratings. Standard setters, market participants, supervisors and central banks should not rely mechanistically on external credit ratings. (Seoul)

Authorities should check that the roles that they have assigned to ratings in regulations and supervisory rules are consistent with the objectives of having investors make independent judgment of risks and perform their own due diligence, and that they do not induce uncritical reliance on credit ratings as a substitute for that independent evaluation. (Rec IV. 8, FSF 2008)

We reaffirm our commitment to reduce authorities’ and financial institutions’ reliance on external credit ratings, and call on standard setters, market participants, supervisors and central banks to implement the agreed FSB principles and end practices that rely mechanistically on these ratings. (Cannes)

We call for accelerated progress by national authorities and standard setting bodies in ending the mechanistic reliance on credit ratings and encourage steps that would enhance transparency of and competition among credit rating agencies. (Los Cabos)

We call on national authorities and standard setting bodies to accelerate progress in reducing reliance on credit rating agencies, in accordance with the FSB roadmap. (St Petersburg)

Remarks

Jurisdictions should indicate the steps they are taking to address the recommendations of the May 2014 FSB thematic peer review report on the implementation of the FSB Principles for Reducing Reliance on Credit Ratings, including by implementing their agreed action plans. Any revised action plans should be sent to the FSB Secretariat so that it can be posted on the FSB website.

Jurisdictions may refer to the following documents:

- FSB Principles for Reducing Reliance on CRA Ratings (Oct 2010)
- FSB Roadmap for Reducing Reliance on CRA Ratings (Nov 2012)
- IAIS ICP guidance 16.9 and 17.8.25
- IOSCO Good Practices on Reducing Reliance on CRAs in Asset Management (Jun 2015)

**Short description of the content of the legislation/regulation/guideline/other actions**

Federal Law No. 222-FZ of 13/07/2015 "On the Activities of Credit Rating Agencies in the Russian Federation, On the Amendment to Article 76.1 of the Federal Law "On the Central Bank of the Russian Federation (Bank of Russia)" and the invalidation of certain provisions of legal acts of the Russian Federation" sets the requirements for: CRAs methodology, Rating and methodological committees; CRAs management, internal control, independent members of Board of Directors, rating analysts; Detection and prevention of conflicts of interests and their resolution; CRAs information disclosure. Adding to this the given Federal Law provides for the use of national rating scale in regulative purposes unless otherwise required by the international standards and such use is recognized in Russia. The Bank of Russia actively participates in the implementation of IRB Approach of Basel II in order to develop risk-management technics in banks and reduce the reliance on Credit Rating Agencies. The Bank of Russia issued the following regulations: Direction No. 3453-U "On Usage Patterns of Credit Ratings Aimed at Application of Regulations of the Bank of Russia" of 25/11/2014; Regulation No. 483-P "On procedure of credit risk calculation based on internal ratings" of 06/08/2015 (amended by Bank of Russia Ordinance No. 3869-U of 01/12/2015 and by Bank of Russia Ordinance No. 5091-U of 10/03/2019); Bank of Russia Ordinance No. 3752-U "On provisions on using IRB approach for the calculation of capital adequacy" of 06/08/2015.

VI. Enhancing and aligning accounting standards

15. Consistent application of high-quality accounting standards

G20/FSB Recommendations

Regulators, supervisors, and accounting standard setters, as appropriate, should work with each other and the private sector on an ongoing basis to ensure consistent application and enforcement of high-quality accounting standards. (Washington)

Remarks

Jurisdictions should indicate the accounting standards that they follow and whether (and on what basis) they are of a high and internationally acceptable quality (e.g. equivalent to IFRSs as published by the IASB), and provide accurate and relevant information on financial position and performance. They should also explain the system they have for enforcement of consistent application of those standards.

Jurisdictions may want to refer to their jurisdictional profile prepared by the IFRS Foundation, which can be accessed at: http://www.ifrs.org/Use-around-the-world/Pages/Analysis-of-the-G20-IFRS-profiles.aspx.

As part of their response on this recommendation, jurisdictions should indicate the policy measures taken for appropriate application of fair value recognition, measurement and disclosure.

In addition, jurisdictions should set out any steps they intend to take (if appropriate) to foster transparent and consistent implementation of the new accounting requirements for the measurement of expected credit losses on financial assets that are being introduced by the IASB and FASB.

See, for reference, the following BCBS documents:

- Supervisory guidance for assessing banks’ financial instrument fair value practices (Apr 2009)
- Guidance on credit risk and accounting for expected credit losses (Dec 2015)
- Regulatory treatment of accounting provisions - interim approach and transitional arrangements (March 2017)

<tr>
<td>In Russia the enforcement system of consistent application of internationally recognized high-quality accounting standards (i.e., IFRS) is based on federal laws as well as regulations of the Government of the Russian Federation, the Ministry of Finance of the Russian Federation and the Bank of Russia. The main relevant acts are: Federal Law No. 208-FZ ‘On Consolidated Financial Reporting’ of 27/07/2010 (hereinafter - Federal Law No. 208-FZ), Federal Law No. 402-FZ ‘On Accounting’ of 06/12/2011 (hereinafter - Federal Law No. 402-FZ), ‘Regulations on the Recognition of the International Financial Reporting Standards for Application on the Territory of the Russian Federation’ approved by the Regulation of the Government of the Russian Federation No. 107 of 25/02/2011 (hereinafter - Regulation No. 107), Order of the Ministry of Finance of the Russian Federation No. 440 ‘On Approval of the Plan of the Ministry of Finance of the Russian Federation for 2012-2015 for the Development of Accounting and Reporting on the Basis of International Financial Reporting Standards in the Russian Federation’ of 30/11/2011 (with the amendments by the Order of the Ministry of Finance No. 455 of 30/11/2012). The Ministry of Finance of the Russian Federation is both the official standard-setting body in accounting and financial reporting and the endorsement body for IFRS Standards (in cooperation with the Bank of Russia). Legal basis for the application of IFRS by Russian companies was created by Federal Law No. 208-FZ. According to this Federal Law consolidated financial reporting should be prepared in compliance with IFRS standards by public companies (whose shares are included in the quotation list), credit organisations, insurance organisations (except for insurance medical organisations exercising activities solely in the sphere of obligatory medical insurance), non-governmental pension funds, management companies of investment funds, unit investment funds and non-governmental pension funds, clearing organisations, federal state unitary enterprises whose list is endorsed by the Government of the Russian Federation, joint-stock companies whose stocks are in federal ownership and whose list is endorsed by the Government of the Russian Federation. Credit organisations and insurance organisations prepare consolidated financial statements in compliance with IFRS standards starting from 2012. The procedure of recognition of IFRS is defined according to Regulations No. 107. IFRS documents enter into force by decision of the Ministry of Finance with the approval of the Bank of Russia. Currently, all IFRS standards published by IFRS Foundation and required for the preparation of financial reports in 2014, 2015 and 2016 are recognized and in effect. All IFRS standards are recognized in the form they were originally published by IFRS Foundation. IFRS Standards are part of the Russian accounting and reporting regulation: Federal Laws 208-FZ ‘On Consolidated Financial Statements’ and 402-FZ ‘On Accounting’. Federal Law No. 208-FZ stipulates that IFRS Standards and Interpretations of IFRS Standards issued by the IFRS Foundation and endorsed by the Ministry of Finance of the Russian Federation in consultation with the Central Bank of the Russian Federation shall be applied in Russia. Usually IFRS enter into force in the Russian Federation: in case of voluntary application since a date of its official publication and in case of mandatory application since a term defined in regulation. Federal Law No. 208-FZ contains requirements for the consistent application of IFRS. For instance, consolidated financial statements are subject to mandatory audit. In general, the Bank of Russia supervises submission and publication of consolidated financial statements which reflect adherence of the reporting entities to IFRS. General regulation on reporting for banks was implemented by the Bank of Russia Ordinance No. 3580-U ‘On...**</td>

<td>In 2017, the Bank of Russia issued based on the IFRS 9 ‘Financial Instruments’ regulations on the accounting of financial instruments: Bank of Russia Regulation No. 604-P ‘On the Procedure for the Recording by Credit institutions of Transactions Involving the Collection of Cash Funds under Bank Deposit Agreements, Loan Agreements, Other Contracts for Raising Funds, Issuing and paying off Bonds, Bills of exchange, Deposit and Savings Certificates’ of 02/10/2017; Bank of Russia Regulation No. 605-P ‘On the Procedure for the Recording by Credit institutions of Transactions for the Provision (placement) of Funds under Loan Agreements, Other Contracts for the Placement of Funds, Transactions Related to the Acquisition of the Right to Demand from Third Parties the Fulfilment of Obligations in Cash, Operations on Obligations under Issued Bank Guarantees and Provision of Funds’ of 02/10/2017; Bank of Russia Regulation No. 606-P ‘On the Procedure for the Recording by Credit institutions of Securities Transactions’ of 02/10/2017; Bank of Russia Regulation No. 617-P ‘On the Procedure for the Recording by Credit institutions of hedge transactions’ of 21/11/2017. The above-mentioned regulatory acts of the Bank of Russia come into force from 01/01/2019 and establish for credit institutions the procedure of accounting for financial instruments based on the principles of IFRS, including the accounting for the amount of the allowance for expected credit losses in accordance with IFRS 9 ‘Financial Instruments’. In 2017 work was carried out to improve the methodological basis for accounting and financial reporting by non-credit financial institutions in accordance with IFRS. A package of documents has been issued that provides for non-credit financial institutions (under certain conditions) more simple accounting rules in comparison with other industry-specific accounting standards for non-credit financial institutions: Bank of Russia Regulation No. 612-P ‘On the Procedure for Accounting by Non-Credit Financial Institutions’ of October 25/10/2017; Bank of Russia Regulation No. 613-P ‘On the Forms of Disclosure of the Information in the Financial (Accounting) Statements of Non-Credit Financial Institutions and on the Procedure for Grouping of Accounts in accordance with the Accounting (Financial) Reporting Key Figures’ of 25/10/2017; Bank of Russia Regulation No. 614-P ‘On the Forms of Disclosure of the Information in the...</td>

16. Enhancing guidance to strengthen banks’ risk management practices, including on liquidity and foreign currency funding risks

**G20/FSB Recommendations**

Regulators should develop enhanced guidance to strengthen banks’ risk management practices, in line with international best practices, and should encourage financial firms to re-examine their internal controls and implement strengthened policies for sound risk management. (Washington)

National supervisors should closely check banks’ implementation of the updated guidance on the management and supervision of liquidity as part of their regular supervision. If banks’ implementation of the guidance is inadequate, supervisors will take more prescriptive action to improve practices. (Rec. II.10, FSF 2008)

Regulators and supervisors in emerging markets will enhance their supervision of banks’ operation in foreign currency funding markets. (FSB 2009)

We commit to conduct robust, transparent stress tests as needed. (Pittsburgh)

**Remarks**

Jurisdictions should indicate the measures taken in the following areas:

- guidance to strengthen banks’ risk management practices, including BCBS good practice documents (Corporate governance principles for banks, External audit of banks, and the Internal audit function in banks);
- measures to monitor and ensure banks’ implementation of the BCBS Principles for Sound Liquidity Risk Management and Supervision (Sep 2008);
- measures to supervise banks’ operations in foreign currency funding markets;1 and
- extent to which they undertake stress tests and publish their results.

Jurisdictions should not provide any updates on the implementation of Basel III liquidity requirements (and other recent standards such as capital requirements for CCPs), since these are monitored separately by the BCBS.

---

1 Only the emerging market jurisdictions that are members of the FSB should respond to this specific recommendation.

- Final rule (for part of the reform) in force since 24/03/2019
16. Enhancing guidance to strengthen banks’ risk management practices, including on liquidity and foreign currency funding risks

We continue our work in the field of risk management practices development.

Bank of Russia Ordinance No. 3624-U ‘On the Requirements to the Risk and Capital Management System of the credit institution and the banking group’ of 15/04/2015 stipulates the requirements for credit institutions’ ICAAP. It includes requirements for banks (banking groups) to have risk management procedures, commensurate to the scale and character of their business, to have capital management procedures including maintenance of capital adequacy sufficient to cover material and potential risks, to conduct stress-tests of material risks, to compile internal ICAAP reporting and develop ICAAP documentation. The compliance with the requirements stipulated by the Bank of Russia Ordinance No. 3624-U, should be assessed by the Bank of Russia Ordinance No. 3883-U ‘On the Assessment of Quality of Risk and Capital Management Framework and Capital Adequacy of Credit Institutions and Banking Groups performed by the Bank of Russia’ (SREP document) of 07/12/2015. Based on the assessment results the CBR is authorised to prescribe a bank to adjust their ICAAP and/or to impose capital add-ons.

1. Liquidity. In order to control liquidity risk taken by all Russian banks (D-SIBs and non-D-SIBs) national liquidity prudential ratios have been in force for more than 20 years. Under the latest version of the Bank of Russia Regulation No. 139-I ‘On Required Ratios for Banks’ on 03/12/2012, the banks should meet on a daily basis three required liquidity ratios: N2 at 15 percent for instant liquidity (over 1 day), N3 at 50 percent for current liquidity (over the next 30 days), and N4 at 120 percent for long-term liquidity (over more than 365 days). The Bank of Russia performs monitoring of liquidity of the banking sector on an ongoing basis. In particular, the Bank of Russia conducts top-down liquidity stress-testing exercise. Liquidity risk management requirements are stipulated by the Ordinance No. 3624-U. Moreover, the Bank of Russia assesses risk management in credit institutions, including liquidity and liquidity risk management procedures, in terms of supervisory assessment of credit institutions’ economic condition assessment in accordance with the Bank of Russia Ordinance No. 4336-U, dated 03/04/2017, ‘On Assessing Banks’ Economic Situation’. Bank of Russia Regulation No. 510-P ‘On the Calculation of the Liquidity Coverage Ratio (‘Basel III’) by Systemically Important Credit Institutions’ of 03/12/2015 includes Principles of Liquidity Risk Management that are based on the BCBS’s document ‘Principles for Sound Liquidity Risk Management and Supervision (September 2008)’ with requirements to the SIBs to arrange their internal liquidity risk management in order to reduce liquidity risk, including foreign currency funding risk. Bank of Russia Regulation No. 596-P, dated 26/07/2017 “On the Procedure for Systemically Important Credit Institutions to Calculate Structural Liquidity Ratio (Net Stable Funding Ratio) (Basel III)” sets the minimum NSFR requirement aimed to maintain robust and sound assets and liabilities structure for systemically important banks.

2. Operational risk. Capital adequacy requirements - as of November 2009 (amended - July 2012). Requirements to operational risk management with regard to organizations providing payment services, June 2012. Recommendations on operational risk management - as of May 2005 and May 2012. Main recommendations regarding bank’s stress-testing procedures were published in 2012 and pertain to development of recovery and resolution plans (Recommendation letter No. 193-T of 29/12/2012). First RRP of banks were analysed by supervisors in 2013. Banks were given recommendation to improve their plans. Operational risk management requirements are stipulated by Ordinance No. 3624-U. 3. Credit risk. Bank of Russia Regulation No. 483-P 'On the Procedure of Credit Risk Calculation Based on Internal Ratings' of 06/08/2015 (amended by the Bank of Russia Ordinance No.
16. Enhancing guidance to strengthen banks’ risk management practices, including on liquidity and foreign currency funding risks

**Update and next steps**

**Highlight main developments since last year’s survey**

- ICAAP reporting form on a solo level was published as an Annex to the Bank of Russia Ordinance No 3624-U on September 5th of 2018. The first ICAAP assessment of all Russian credit institutions was conducted in 2018 – first half of 2019.

- The Bank of Russia Regulation No. 180-I ‘On Required Ratios for Banks’ of 28/06/2017 replaced the Bank of Russia Regulation No. 139-I ‘On Required Ratios for Banks’, required liquidity ratios N2, N3 and N4 remained unchanged. Banks with universal licence are to comply with required liquidity ratios N2, N3 and N4, banks with a basic licence are to comply with required liquidity ratio N3.

- Bank of Russia Regulation No. 653-P dated 04/10/2018 set requirements on the content, the procedure and the terms for submission of recovery plans by credit institutions (including D-SIBs) to the Bank of Russia.

**Planned actions (if any) and expected commencement date**

- The draft regulation on the interest rate risk in the banking book (IRRBB) was published on 29 October 2018 and it is expected to be finalised and adopted in 2019. At the first stage the new methodology of the IRRBB measure (under the standardised framework) will be applied as recommendations for the largest banks. The updated reporting form on the IRRBB and corresponding changes in the supervisory assessment with outliers’ identification based on the new IRRBB standard will be introduced in 2020.

- Draft of ICAAP reporting form on a group level has been developed and is expected to be published in the 4th quarter of 2019. It is planned to assess ICAAPs of all Russian banking groups in the 4th quarter of 2019.

The abovementioned draft also includes:
- additional specific requirements on stress-testing procedures;
- step-in risk management requirements.

G20/FSB Recommendations

Financial institutions should provide enhanced risk disclosures in their reporting and disclose all losses on an ongoing basis, consistent with international best practice, as appropriate. (Washington)

We encourage further efforts by the public and private sector to enhance financial institutions’ disclosures of the risks they face, including the ongoing work of the Enhanced Disclosure Task Force. (St. Petersburg)

Remarks

Jurisdictions should indicate the status of implementation of the disclosures requirements of IFRSs (in particular IFRS 7 and 13) or equivalent. Jurisdictions may also use as reference the recommendations of the October 2012 report by the Enhanced Disclosure Task Force on Enhancing the RiskDisclosures of Banks and Implementation Progress Report by the EDTF (Dec 2015), and set out any steps they have taken to foster adoption of the EDTF Principles and Recommendations.

In addition, in light of the new IASB and FASB accounting requirements for expected credit loss recognition, jurisdictions should set out any steps they intend to take (if appropriate) to foster disclosures needed to fairly depict a bank’s exposure to credit risk, including its expected credit loss estimates, and to provide relevant information on a bank’s underwriting practices. Jurisdictions may use as reference the recommendations in the report by the Enhanced Disclosure Task Force on the Impact of Expected Credit Loss Approaches on Bank Risk Disclosures (Nov 2015), as well as the recommendations in Principle 8 of the BCBS Guidance on credit risk and accounting for expected credit losses (Dec 2015).

In their responses, jurisdictions should not provide information on the implementation of Basel III Pillar 3 requirements, since this is monitored separately by the BCBS.

VIII. Strengthening deposit insurance

18. Strengthening of national deposit insurance arrangements

G20/FSB Recommendations

National deposit insurance arrangements should be reviewed against the agreed international principles, and authorities should strengthen arrangements where needed. (Rec. VI.9, FSF 2008)

Remarks

Jurisdictions that have not yet adopted an explicit national deposit insurance system should describe their plans to introduce such a system.

All other jurisdictions should describe any significant design changes in their national deposit insurance system since the issuance of the revised IADI Core Principles for Effective Deposit Insurance Systems (November 2014).

In addition, jurisdictions should indicate if they have carried out a self-assessment of compliance (based on IADI’s 2016 Handbook) with the revised Core Principles:

- If so, jurisdictions should highlight the main gaps identified and the steps proposed to address these gaps;
- If not, jurisdictions should indicate any plans to undertake a self-assessment exercise.

Progress to date

#### Short description of the content of the legislation/regulation/guideline/other actions

The Federal Law No. 177-FZ "On the Insurance of Deposits with Banks of the Russian Federation" of 23/12/2003 (earlier title of this Federal Law - "On the Insurance of Individuals' Deposits with Banks of the Russian Federation"), hereinafter - Federal Law No. 177-FZ establishes legal, financial and institutional foundations of the mandatory insurance system of deposits made with banks in Russia, terms of reference, the procedure of establishment and operation of the organization which fulfills functions related to mandatory insurance of deposits (Deposits Insurance Agency - DIA), the procedure of payout of the compensation on deposits, regulates relations between banks in Russia, DIA, the Bank of Russia and executive bodies of the Russian Federation in the field of mandatory insurance of deposits made with banks in Russia. Under amendment to Federal Law No. 177-FZ by Federal Law No. 432-FZ of 22/12/2014, differentiated rates of banks' mandatory payments to the deposit insurance fund were prescribed. According to Article 36 of the Federal Law No. 177-FZ there are three types of insurance premiums paid by banks to DIA: the basic, additional and enhanced additional rate of insurance premiums. The basic rate of insurance premiums shall be established in an amount which is uniform for all banks and shall be paid by all banks. An additional rate of insurance premiums shall be established in the amount of at most 50 per cent of the basic rate and shall be uniform for all banks. The enhanced additional rate of insurance premiums shall be paid by banks in the instance or in the instances when: - they have attracted at least one deposit within any month of a quarter or have made an agreement on changing the terms of a banking deposit agreement subject to the conditions of profitability of a deposit comprising interest payments and other material gain in the amount exceeding by more than two but at most by three percentage points of annual interest the basic profitability level of deposits determined by the Bank of Russia for an appropriate month in respect of deposits in the currency of the Russian Federation or in foreign currency. An enhanced additional rate of insurance premiums shall be paid by banks in the instance or in the instances when: - they have attracted at least one deposit within any month of a quarter or have made an agreement on changing the terms of a banking deposit agreement subject to the conditions of profitability of a deposit comprising interest payments and other material gain in the amount exceeding by more than three percentage points of annual interest the basic profitability level of deposits determined by the Bank of Russia for an appropriate month in respect of deposits in the currency of the Russian Federation or in foreign currency; - the financial position of banks satisfies the criteria for paying an enhanced additional rate established by a regulatory act of the Bank of Russia (Bank of Russia Ordinance No.3801-U). Bank of Russia Ordinance No. 3801-U "On Admission of Financial Position of a Bank Appropriate for Imposition of Increased Additional Premium Rates" of 17/09/2015 prescribes framework for comprehensive assessment of financial position including equity capital, liquidity position, risk management system and internal control of banks that are members of deposit insurance scheme, the assessment itself is carried out by the Bank of Russia. If certain conditions (cumulative assessment results are higher than 2.35 quality points and/or at least one restriction and/or ban measure is imposed) are met higher premium rates will be applied. The Bank of Russia Ordinance No. 3607-U 'On Determining the Base Level of Profitableness of Deposits' of 23/03/2015 specifies the procedure for the determination of the base level of profitableness of deposits, according to which the base level of profitableness of...

### G20/FSB Recommendations

We must ensure that markets serve efficient allocation of investments and savings in our economies and do not pose risks to financial stability. To this end, we commit to implement initial recommendations by IOSCO on market integrity and efficiency, including measures to address the risks posed by high frequency trading and dark liquidity, and call for further work by mid-2012. (Cannes)

### Remarks

Jurisdictions should indicate whether high frequency trading and dark pools exist in their national markets.

Jurisdictions should indicate the progress made in implementing the recommendations:

- on the impact of technological change in the IOSCO Report on Regulatory Issues Raised by the Impact of Technological Changes on Market Integrity and Efficiency (Oct 2011).
- on market structure made in the IOSCO Report on Regulatory issues raised by changes in market structure (Dec 2013).

#### Issue is being addressed through
- [x] Primary / Secondary legislation
- [x] Regulation / Guidelines
- [x] Other actions (such as supervisory actions)

#### Short description of the content of the legislation/regulation/guideline/other actions

Federal Law No. 325-FZ 'On Organized Trade' of 21/11/2011 sets legal framework for trade organizers and exchanges. Federal Securities Market Law provides for prudential supervision system for non-bank securities market intermediaries, in particular, sets requirements for non-banks professional market participants, including their securities lending and repos activity. Bank of Russia Ordinance No. 437-U of 11/05/2017 stipulates equity capital requirements for professional securities market participants other than credit institutions, forex dealers, and professional securities market participants also licensed to provide management companies services. Bank of Russia Regulation No. 437-P 'On Regulation and Requirements for Organized and Regulated Markets' of 17/10/2014 established organizational and operating requirements for stock and commodity exchanges and trading platforms, including disclosure rules and pre- and post-trade transparency requirements, regulation for derivatives traded on exchanges and foreign exchange market. The said regulation provides occasions for a trading halt or suspension in the trading by a trade organizer. The regulation of the Bank of Russia as of 2017 (to amend the existing regulation) envisages broader scope to launch a discretionary auction, which will become possible as from 01/07/2018. Bank of Russia Regulation No. 437-P established an ability of exchanges to trade in different trading conditions, including conditions where quotes are not disclosed to public, so current legislation doesn't set any restrictions on dark liquidity. The legislation does not stipulate for other hidden trade frameworks, except for provisions on trading based on two targeted bids. The framework of anonymous trading does not provide for any restrictions on tendering of "iceberg" bids. The procedure of tendering of such bids is defined by trading rules. Currently there is no "dark pool" trading system at the Russian financial market. There is no specialized regulation of HFT in Russia, but certain requirements to HFT are set by organized trading rules of the Moscow Exchange. The rules are registered by the Bank of Russia in accordance with Article 4 of Federal Law No. 325-FZ 'On Organized Trade' of 21/11/2011. The Bank of Russia conducted a research "Assessing HFT influence on the Russian financial market" (April 2018, a link to the research could be found in Relevant web-links) with the following conclusions: significant number of HFT participants, HFT participants cover substantial share in the volume of trading most liquid assets (from 35% to 50% depending on the type of an asset), HFT participants contribute to the market liquidity, statistically HFT participants (rather than non-HFT participants) tend to quote financial instruments closer to spread. The Bank of Russia is authorized to exchange information (including confidential information) under the IOSCO MMoU and bilateral MoUs pursuant to Federal Law No. 86-FZ dated 10/07/2002 'On the Central Bank of the Russian Federation (the Bank of Russia)', inter alia in the course of the relevant investigation conducted by the Bank of Russia pursuant to Federal law No. 224-FZ dated 27/07/2010 'On combating the misuse of insider information and market manipulation (market abuse) and on amendments to certain legislative acts of the Russian Federation'.

G20/FSB Recommendations

We need to ensure enhanced market transparency, both on cash and financial commodity markets, including OTC, and achieve appropriate regulation and supervision of participants in these markets. Market regulators and authorities should be granted effective intervention powers to address disorderly markets and prevent market abuses. In particular, market regulators should have, and use formal position management powers, including the power to set ex-ante position limits, particularly in the delivery month where appropriate, among other powers of intervention. We call on IOSCO to report on the implementation of its recommendations by the end of 2012. (Cannes)

We also call on Finance ministers to monitor on a regular basis the proper implementation of IOSCO’s principles for the regulation and supervision on commodity derivatives markets and encourage broader publishing and unrestricted access to aggregated open interest data. (St. Petersburg)

Remarks

Jurisdictions should indicate whether commodity markets of any type exist in their national markets.

Jurisdictions should indicate the policy measures taken to implement the principles found in IOSCO’s report on Principles for the Regulation and Supervision of Commodity Derivatives Markets (Sep 2011). Jurisdictions, in responding to this recommendation, may also make use of the responses contained in the update to the survey published by IOSCO in September 2014 on the principles for the regulation and supervision of commodity derivatives markets.

<tr>
<td>There are several licensed commodity exchanges working in Russia. They represent regulated markets of such commodity goods as: oil and petroleum products, energy and natural gas, metals, timber, construction materials, agricultural commodities, chemicals, pharmaceuticals. Federal Law No. 325-FZ 'On Organized Trading' of 21/11/2011 regulates relationships on commodities and financial markets, introduces principles for state regulation and control of organized trading on these markets. It also stipulates that all OTC transactions with exchange commodities should be reported to commodity exchange. According to Federal Law No. 224-FZ dated 27/07/2010 &quot;On combating the misuse of insider information and market manipulation (market abuse) and on amendments to certain legislative acts of the Russian Federation&quot;, the Bank of Russia counters market abuse on organized trading, inter alia related to financial instruments and commodities, such as insider trading and (or) market manipulation. Bank of Russia Regulation No. 437-P 'On Regulation and Requirements for Organized and Regulated Markets' of 17/10/2014 sets disclosure rules, trade and post-trade transparency requirements for all types of exchanges. Russia's Government Decree No. 623 on reporting of OTC trades of 23/07/2013 created a mechanism for consolidation of information about most of the trades on OTC markets for such commodities as Coal, Crude oil, Natural gas, LPG, Oil-products and Grain (wheat). This mechanism makes eligible exchange to act as a repository for OTC trades giving it the possibility to calculate representative indices of OTC market (using information about actual deals only). All Russian credit institutions are required to calculate commodities risk capital charge according to Bank of Russia Regulation No. 511-P, dated 03/12/2015 'On the Procedure for Calculating Market Risk by Credit Institutions' for the capital adequacy purposes. Commodity market transparency was enhanced by extension of commodities types that have mandatory data disclosure requirement and deal registration on stock exchange. Currently, OTC deals with transfer of ownership in commodities should be registered on exchange if underlying contracts are covering natural gas or liquefied petroleum gas (LPG) - Government Decree No. 764 of 28/07/2015. In the fall of 2015 Memorandum of cooperation on commodity markets development was signed by three Russian regulators: Bank of Russia, Federal Antimonopoly Service and Federal Tax Service. The main goal was to achieve comprehensive and reliable indicators (indices) of internal commodity markets.</td>

21. Reform of financial benchmarks

G20/FSB Recommendations

We support the establishment of the FSB’s Official Sector Steering Group to coordinate work on the necessary reforms of financial benchmarks. We endorse IOSCO’s Principles for Financial Benchmarks and look forward to reform as necessary of the benchmarks used internationally in the banking industry and financial markets, consistent with the IOSCO Principles. (St. Petersburg)

Collection of information on this recommendation will continue to be deferred given the ongoing reporting of progress in this area by the FSB Official Sector Steering Group, and ongoing IOSCO work to review the implementation of the IOSCO Principles for Financial Benchmarks.
22. Enhancing financial consumer protection

G20/FSB Recommendations

We agree that integration of financial consumer protection policies into regulatory and supervisory frameworks contributes to strengthening financial stability, endorse the FSB report on consumer finance protection and the high level principles on financial consumer protection prepared by the OECD together with the FSB. We will pursue the full application of these principles in our jurisdictions. (Cannes)

Remarks

Jurisdictions should describe progress toward implementation of the OECD’s G-20 high-level principles on financial consumer protection (Oct 2011). Jurisdictions may refer to OECD’s September 2013 and September 2014 reports on effective approaches to support the implementation of the High-level Principles as well as the G20/OECD Policy Guidance on Financial Consumer Protection in the Digital Age, which provides additional effective approaches for operating in a digital environment. The effective approaches are of interest across all financial services sectors – banking and credit; securities; insurance and pensions – and consideration should be given to their cross-sectoral character when considering implementation. In the case of private pensions, additional guidance can be found in the Good Practices on the Role of Pension Supervisory Authorities in Consumer Protection Related to Private Pension Systems.

Jurisdictions should, where necessary, indicate any changes or additions that have been introduced as a way to support the implementation of the High-level Principles, to address particular national terminology, situations or determinations.

Progress to date

- Not applicable
- Applicable but no action envisaged at the moment
- Implementation ongoing
- Implementation completed as of 01.12.2013

If “Not applicable” or “Applicable but no action envisaged…” has been selected, please provide a brief justification.

If “Implementation ongoing” has been selected, please specify

- Draft in preparation, expected publication by
- Draft published as of
- Final rule or legislation approved and will come into force on
- Final rule (for part of the reform) in force since

Russia / IMN Survey 2019
## 22. Enhancing financial consumer protection

### Progress to date

**Issue is being addressed through**
- ✔ Primary / Secondary legislation
- ✔ Regulation / Guidelines
- ✔ Other actions (such as supervisory actions)

**Short description of the content of the legislation/regulation/guideline/other actions**

3. **Federal Law No. 75-FZ of 07.05.1998 (ed. on 03.08.2018) “On Non-Government Pension Funds”**.
   - maximum interest rates are limited;
   - maximum fines and charges for overdue payments are limited;
   - scope of information monthly sent to the borrower is defined;
   - stimulating measures for credit institutions to perform their informational obligations are introduced;
   - a period during which a person can withdraw from a credit (loan) contract without paying any fines in addition to charged interest during the period is introduced.
5. **Ordinance of the Bank of Russia No. 3240-U of 23.04.2014 (ed. on 15.05.2018) ‘On the Table Form of Individual Terms and Conditions of Consumer Credit (Loan) Agreement’ that creditors shall present to borrowers to make a decision to enter into agreement**.
7. **Bank of Russia Ordinance No. 48-P of 04.05.1999 (ed. on 04.05.2012) ‘On the Procedure of Defining by the Bank of Russia Categories of Consumer Credits (Loans) and on the Procedure of Calculation on a Quarterly Basis and Publication of Average Market Effective Interest Rate in Percent per Annum’ of 01/04/2019**.
8. **Federal Law No. 46-FZ of 05.03.1999 (ed. on 03.07.2016) ‘On the Protection of Rights and Legitimate Interests of Investors on the Securities Market’ stipulates conditions for investor protection of investors, including natural persons and not licenced legal entities**.
10. **Federal law No. 224-FZ of 27.07.2010 (ed. on 27.12.2018) “On Combating the Misuse of Insider Information and Market Manipulation (Market Abuse) and on Amendments to Certain Legislative Acts of the Russian Federation”, aimed at fair price formation for financial instruments, foreign currency and (or) commodities, equal rights for investors and strengthening investors’ trust, stipulates requirements prohibiting market abuse on the organized trading of the aforementioned types of assets**.
11. **Regulation of the Bank of Russia of 03.08.2015 No. 482-P establishes requirements for the management of client’s assets taking into account the client’s...**

If this recommendation has not yet been fully implemented, please provide **reasons for delayed implementation**.
### Update and next steps

#### Highlight main developments since last year’s survey

1. In June 2018, Russia’s President signed into law a bill creating the Institute of the Financial Consumer Ombudsman (Federal Law of 04.06.2018 № 123-FZ “On the Financial Ombudsman”). The law is to build a system for out-of-court dispute settlement between Russian citizens and financial institutions for claims of up to 500,000 rubles.

2. In 2018, the Bank of Russia approved the basic standards for insurance companies’ and insurance brokers’, trust managers’, forex dealers’, brokers’ customer protection. Each standard lays out key principles of consumer protection and establishes requirements with which insurance companies and insurance brokers, trust managers, brokers must comply.

3. On 1 May 2019 the law, entitling individual borrowers facing difficult circumstances to mortgage payment holidays, was adopted (Federal Law No. 76-FZ). The law will come into force on 31 July 2019. In order to protect mortgage borrowers’ rights the new regulation entitles borrowers facing difficult circumstances to ask lenders to establish a grace period of up to six months. During this time, the borrowers, at their own discretion, could either suspend or decrease payments.

4. On 28.11.2018 the Bank of Russia released the Information letter № IN-01-59/69 “On selling the financial products” containing recommendations for all financial institutions when selling financial products and tools to use specific scenarios (scripts) for communication with consumers compliant to best practices in the protection of consumers rights and interests. The recommendations envisage creation of standard and individual scripts. Self-regulated organizations should prepare standard scripts, that foresee that information on financial products’ characteristics and risks provided to consumers is as complete as possible. Financial institutions may develop scripts on their own, but the subsequent approval of SRO and compliance with the principles of consumer protection are binding.

5. In 2017 and 2018 the Bank of Russia, inter alia for the purpose of protecting investors, founded two Competency Centers, in Krasnodar and Khabarovsk respectively, on countering unlicensed regulated activity in the financial market responsible for proactive and reactive detecting and identifying persons that are involved in unlicensed regulated activity (an activity in the
