Global Shadow Banking Monitoring Report 2014

30 October 2014

The report can be found at:

http://www.financialstabilityboard.org/publications/r_141030.pdf

Data in Excel format can be found at:

http://www.financialstabilityboard.org/shadow_bkg_data/sb_monitoring_dataset_xls.xls

Note: Figures published here are from the FSB annual monitoring exercise that assesses global trends and risks of the shadow banking system. Figures show financial assets when available, otherwise total assets. These figures may differ from similar statistics published by national/regional authorities due to differences in definitions.

20+EA-group: Argentina, Australia, Brazil, Canada, Switzerland, Chile, China, the United Kingdom, Hong Kong, Indonesia, India, Japan, Korea, Mexico, Russia, Saudi Arabia, Singapore, Turkey, United States, Euro Area, South Africa.

Note: Banks refer to the broader category of Deposit-taking Institutions. Financial assets when available, otherwise total assets. Converted to USD using the end of the period market exchange rates. Aggregated across jurisdictions. In case of missing data in a time series, values were not inter- or extrapolated. Some aggregated series have breaks and an increase in an aggregated series may be the result of improvements in reporting of a sub-sector over time rather than an increase in the volume of financial assets. The Banks' assets to OFIs and Banks' liabilities to OFIs figures are not adjusted for banks' assets and liabilities to OFIs that are prudentially consolidated into banking groups.

The size of the Hedge Fund sector is significantly underestimated primarily due to two factors. First, off-shore financial centres, where most Hedge Funds are domiciled, are not included in the current scope of the exercise. Second, the Flow of Funds statistics are not granular enough in many jurisdictions to allow a separation between Hedge Funds and other sectors.
